BRICK KIT

This book comes with an awesome collection of LEGO® pieces that can be used to complete all the builds. Learn the names of the pieces to make building the ninja world even easier.

BRICKS

Bricks come in different shapes and have knobs that connect to other pieces. *Bricks* are three *plates* high.

This is a *plate with a c-clip.*

A *brick* can have knobs on its sides as well as on top.

Because of its shape, this *brick* is sometimes called a *washing machine* or *headlight brick.*

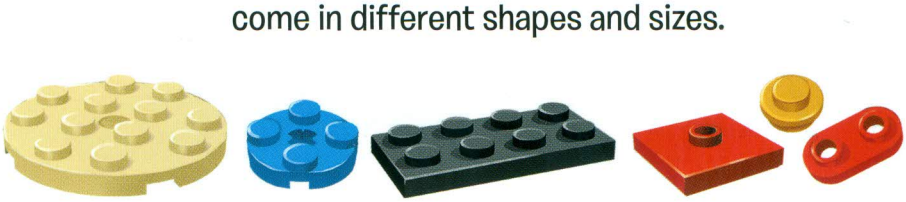

SLOPES

Slopes are slanted pieces. This *slope* is known as a *cheese slope*, because it looks like a piece of cheese!

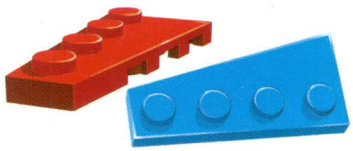

PLATES

Plates are flat pieces with knobs. They also come in different shapes and sizes.

Plates of this shape are called *angular plates.*

These are *plates with bars.* They can be connected to *plates with clips* to build a movable element.

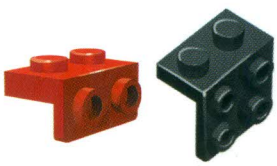

This type of *plate* is called a *1x1 clip.*

This is a *plate with a c-clip.*

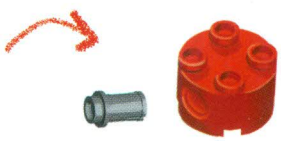

Plates shaped like this are called *angle plates.*

TIPS

A *technic pin* is a piece that connects to a *brick with a hole.* This allows the connected pieces to rotate.

When you see this symbol in the book, it means you should rotate the model for the next building step. This will help you to see how the model is built.

HOW TO USE THIS BOOK

The ninja world is filled with exciting surprises. Go through this book to discover them all.

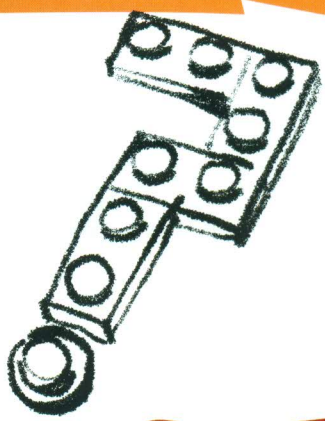

A NINJA ADVENTURE

An amazing ninja journey awaits you, but you don't need to bring any luggage – just use the LEGO pieces provided with this set.

PICK YOUR PATH

Unusual vehicles, modern gadgets, monstrous creatures or amazing locations? Just choose the chapter you want to explore first to start your ninja adventure.

DOUBLE THE FUN

You can choose to complete the challenges on your own, or have a go at doing them with friends or family. It's up to you!

USE YOUR IMAGINATION

While many of the models in this book have building instructions, others are a starting point to inspire your own fantastic builds.

BEYOND THE BUILD

Along with the many brick models, you'll also find lots of ideas for challenges and activities. Have fun trying them all!

CHAPTER 1

AWESOME VEHICLES

The ninja love things that go. Build the vehicles shown, or create your own. Your ninja vehicle can drive, fly or even float!

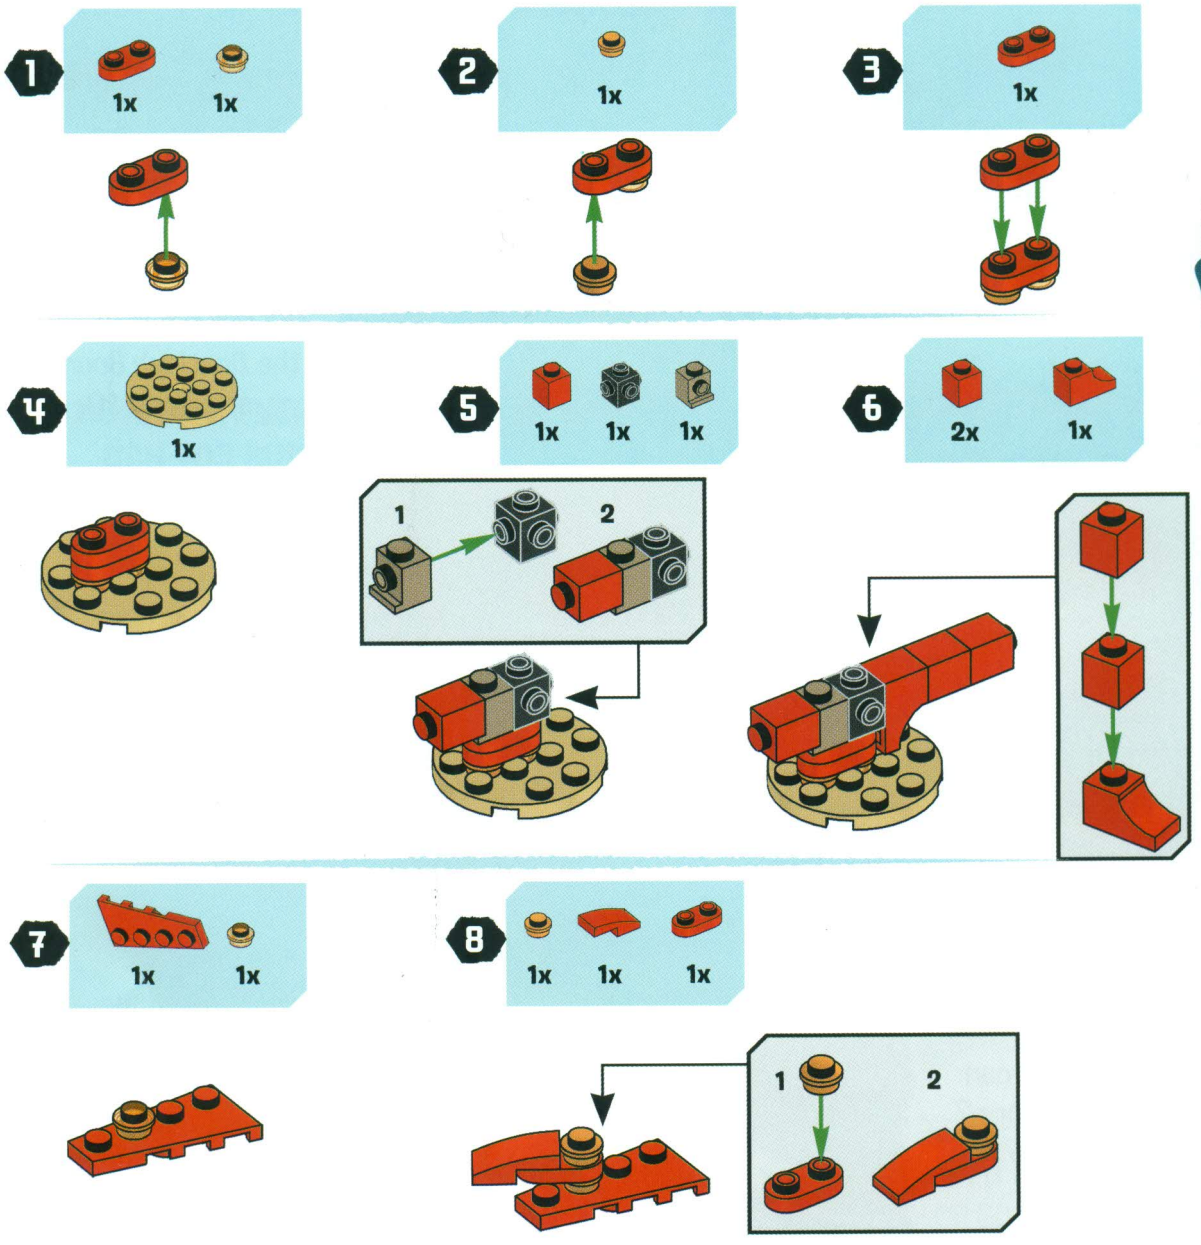

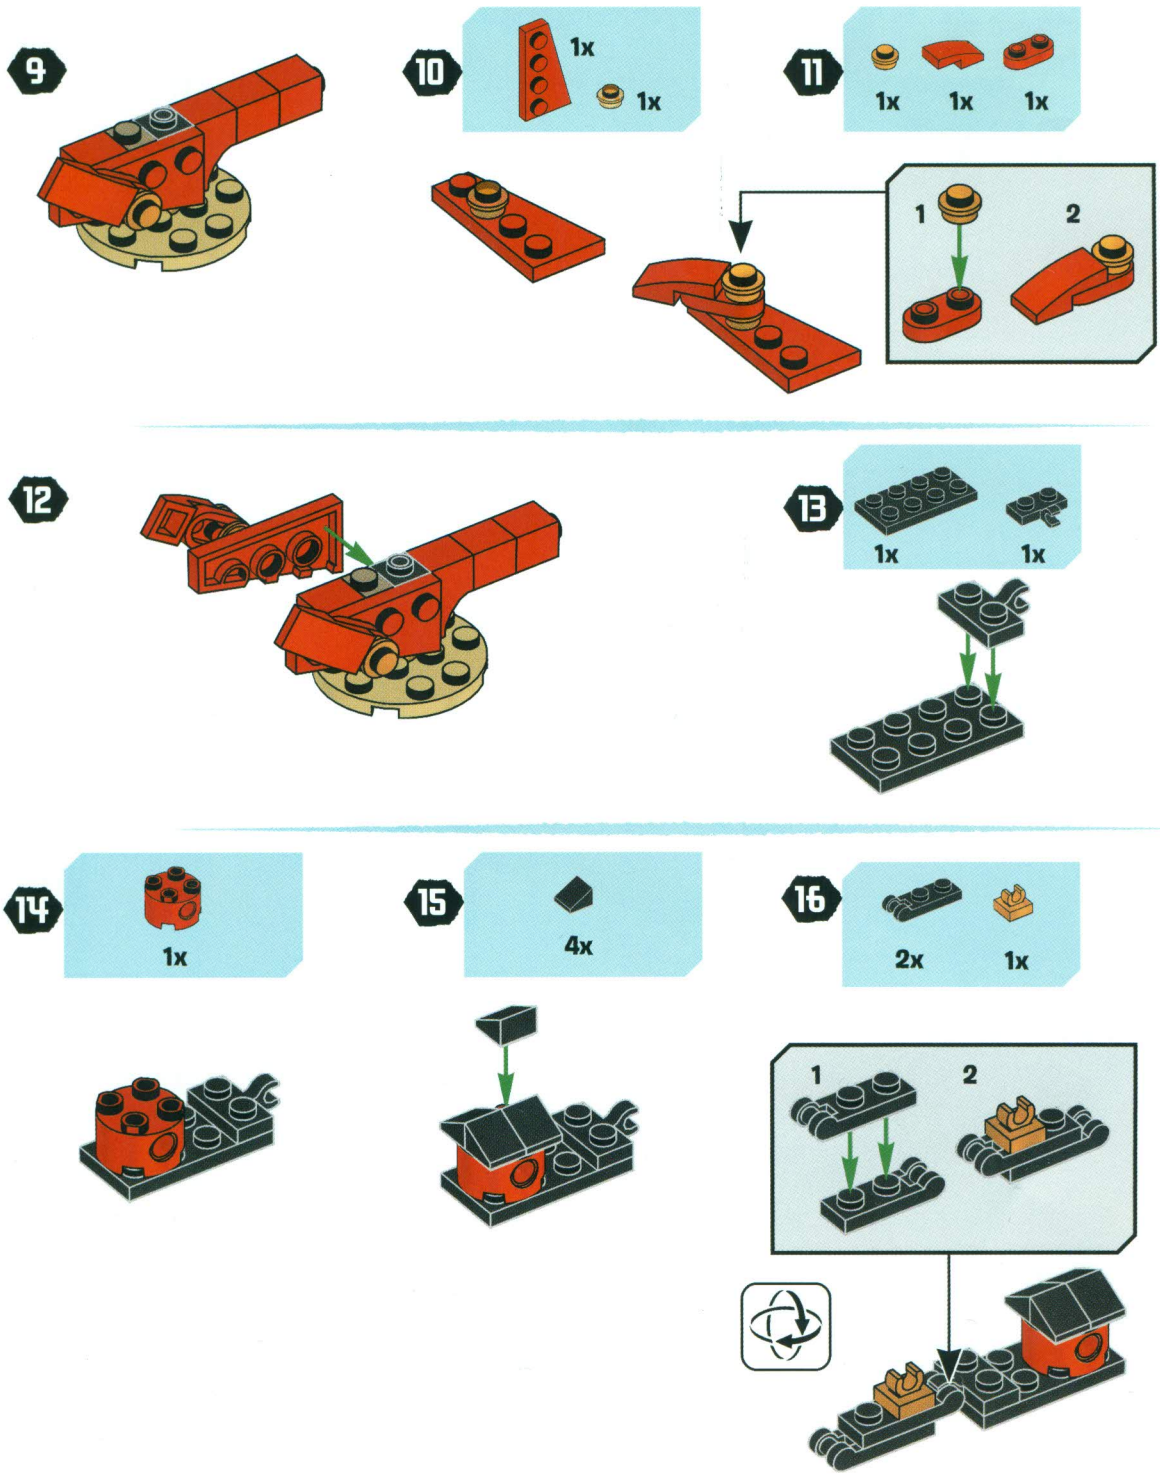

Want to build a ninja-style jet? Go to **page 24**.
To learn how to build the famous ninja ship, the *Destiny's Bounty*, see **page 10**.
Do you dream of a sailboat that can handle any storm? Head to **page 18**.

THE *DESTINY'S BOUNTY*

The *Destiny's Bounty* has embarked upon many amazing missions and survived a few catastrophes! Build your own version of the legendary ship.

BUILDING INSTRUCTIONS (CONTINUED)

17

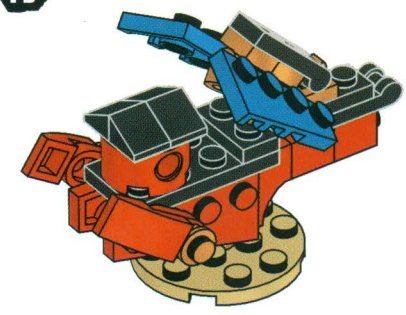

18

19

BRICK BOOST

A SHIP NEEDS AN ANCHOR TO KEEP IT FROM BEING CARRIED AWAY BY THE WAVES. BUILD IT!

Put both *technic pins* in the *brick with a hole*. You'll then be able to use these same pieces for the other builds in the book.

SAIL THE *BLACK BOUNTY*

When Lord Garmadon became captain of the *Destiny's Bounty*, he turned the ship into a true terror of the seas and named it the *Black Bounty*. You'll only need five minutes to transform your model into this ghastly ship.

HOW IT'S DONE

1. Go to **page 10** and complete steps 1-14 of the *Destiny's Bounty* building instructions.

2. After you complete step 14, it's time to add a roof to the captain's bridge. This time, instead of a sloping roof, use a *2x2 final brick* and *1x1 clip* to add a dome to the bridge.

3. Complete steps 16-19 of the *Destiny's Bounty* building instructions.

4. Use your remaining pieces to build the spookiest sails you can.

BRICK BOOST
INSTEAD OF USING THE INSTRUCTIONS, USE YOUR IMAGINATION AND BUILD A BRAND NEW *BLACK BOUNTY*. JUST REMEMBER TO MAKE IT FEARSOME AND DREADFUL!
HA! THE *BLACK BOUNTY* MAKES EVERY PIRATE CREW TURN THEIR SHIP AROUND AND SAIL AWAY AS FAST AS THEY CAN!

STORM WARNING!

The legendary *Destiny's Bounty* has survived many storms while at sea. Can you build a ship that can weather a storm? Try this activity to find out!

HOW IT'S DONE

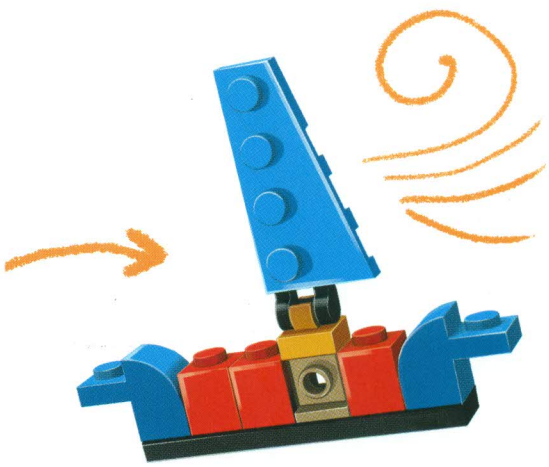

1. Take as many bricks as you can fit in both hands and hold them above the whirlpool on the opposite page.

2. Drop the pieces, then pick up the ones that land inside the whirlpool.

3. Now use these pieces to build something else that floats. It could be a small ship, or a lifeboat to escape from the storm.

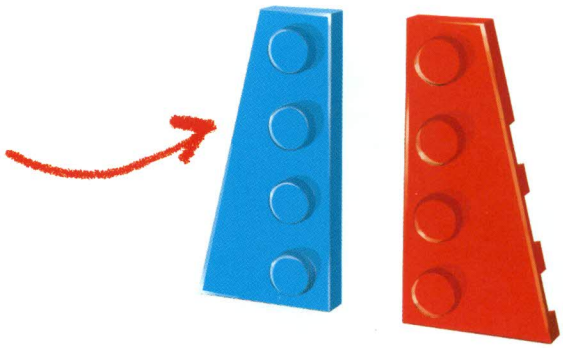

BRICK BOOST
IF YOU WANT, INVITE ANOTHER PERSON TO PLAY. YOU CAN EACH BUILD YOUR OWN TYPE OF FLOATING VEHICLE AND COME UP WITH A WACKY NAME FOR IT!
IF I HAD MY OWN BOAT, I WOULD NAME IT *NYA*!

NINJA SAILBOAT

Build a sailboat for the ninja's next dangerous mission on the high seas.

HOW IT'S DONE

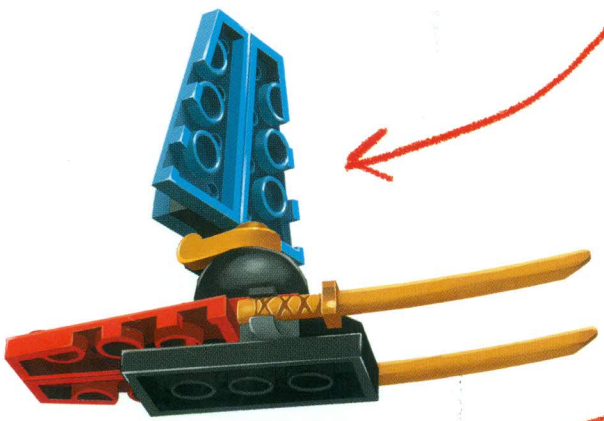

1. Decide whether your ship's deck will be red or blue, and build it with two *angular plates*.

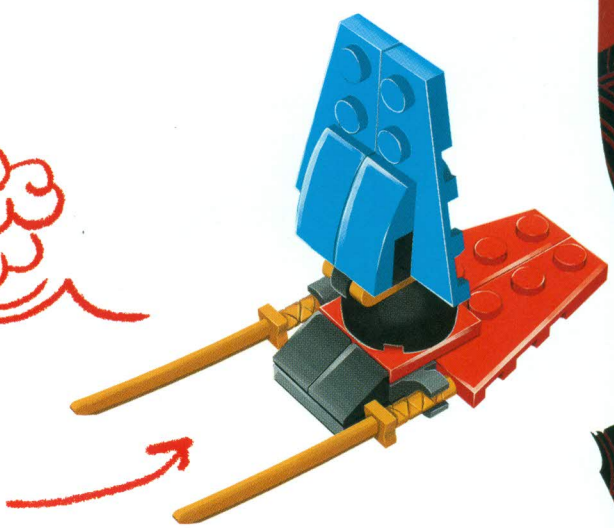

2. Use a *plate with a bar* to build the mast, so that the sails can move.

3. Use the other two *angular plates* to build the sails.

4. Don't forget to add sword-holders. This is a ninja sailboat, after all.

BRICK BOOST
CAN A SAILBOAT BECOME A FAST MOTORBOAT? JUST ADD A FEW EXTRA PIECES AND SEE WHAT HAPPENS.

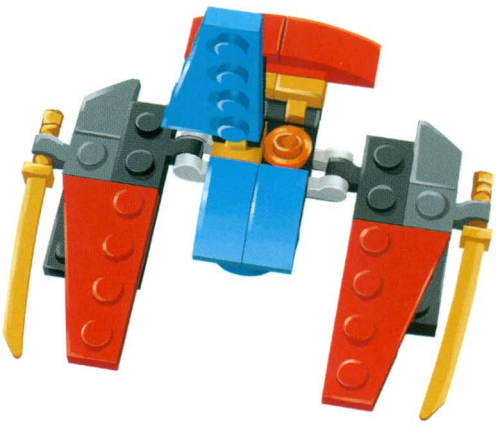

SPEEDY AT SEA

A catamaran is a boat with two hulls, which make it extra speedy at sea. That makes it great for chasing pirates - or escaping sea monsters!

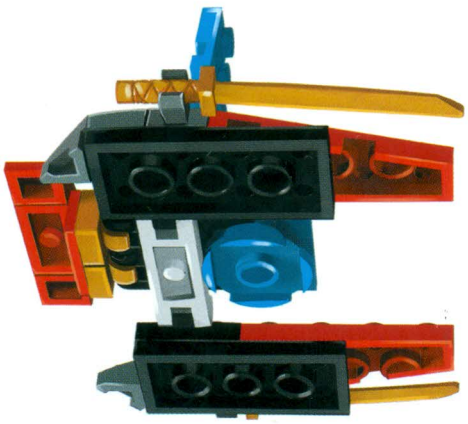

HOW IT'S DONE

1. Choose two identical sets of pieces and use them to build mirror-image hulls.

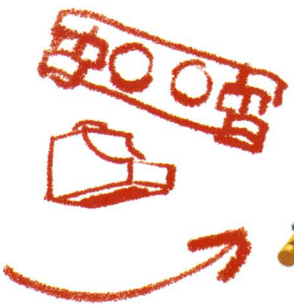

2. Use the remaining pieces to connect the two hulls and to build some cool gadgets.

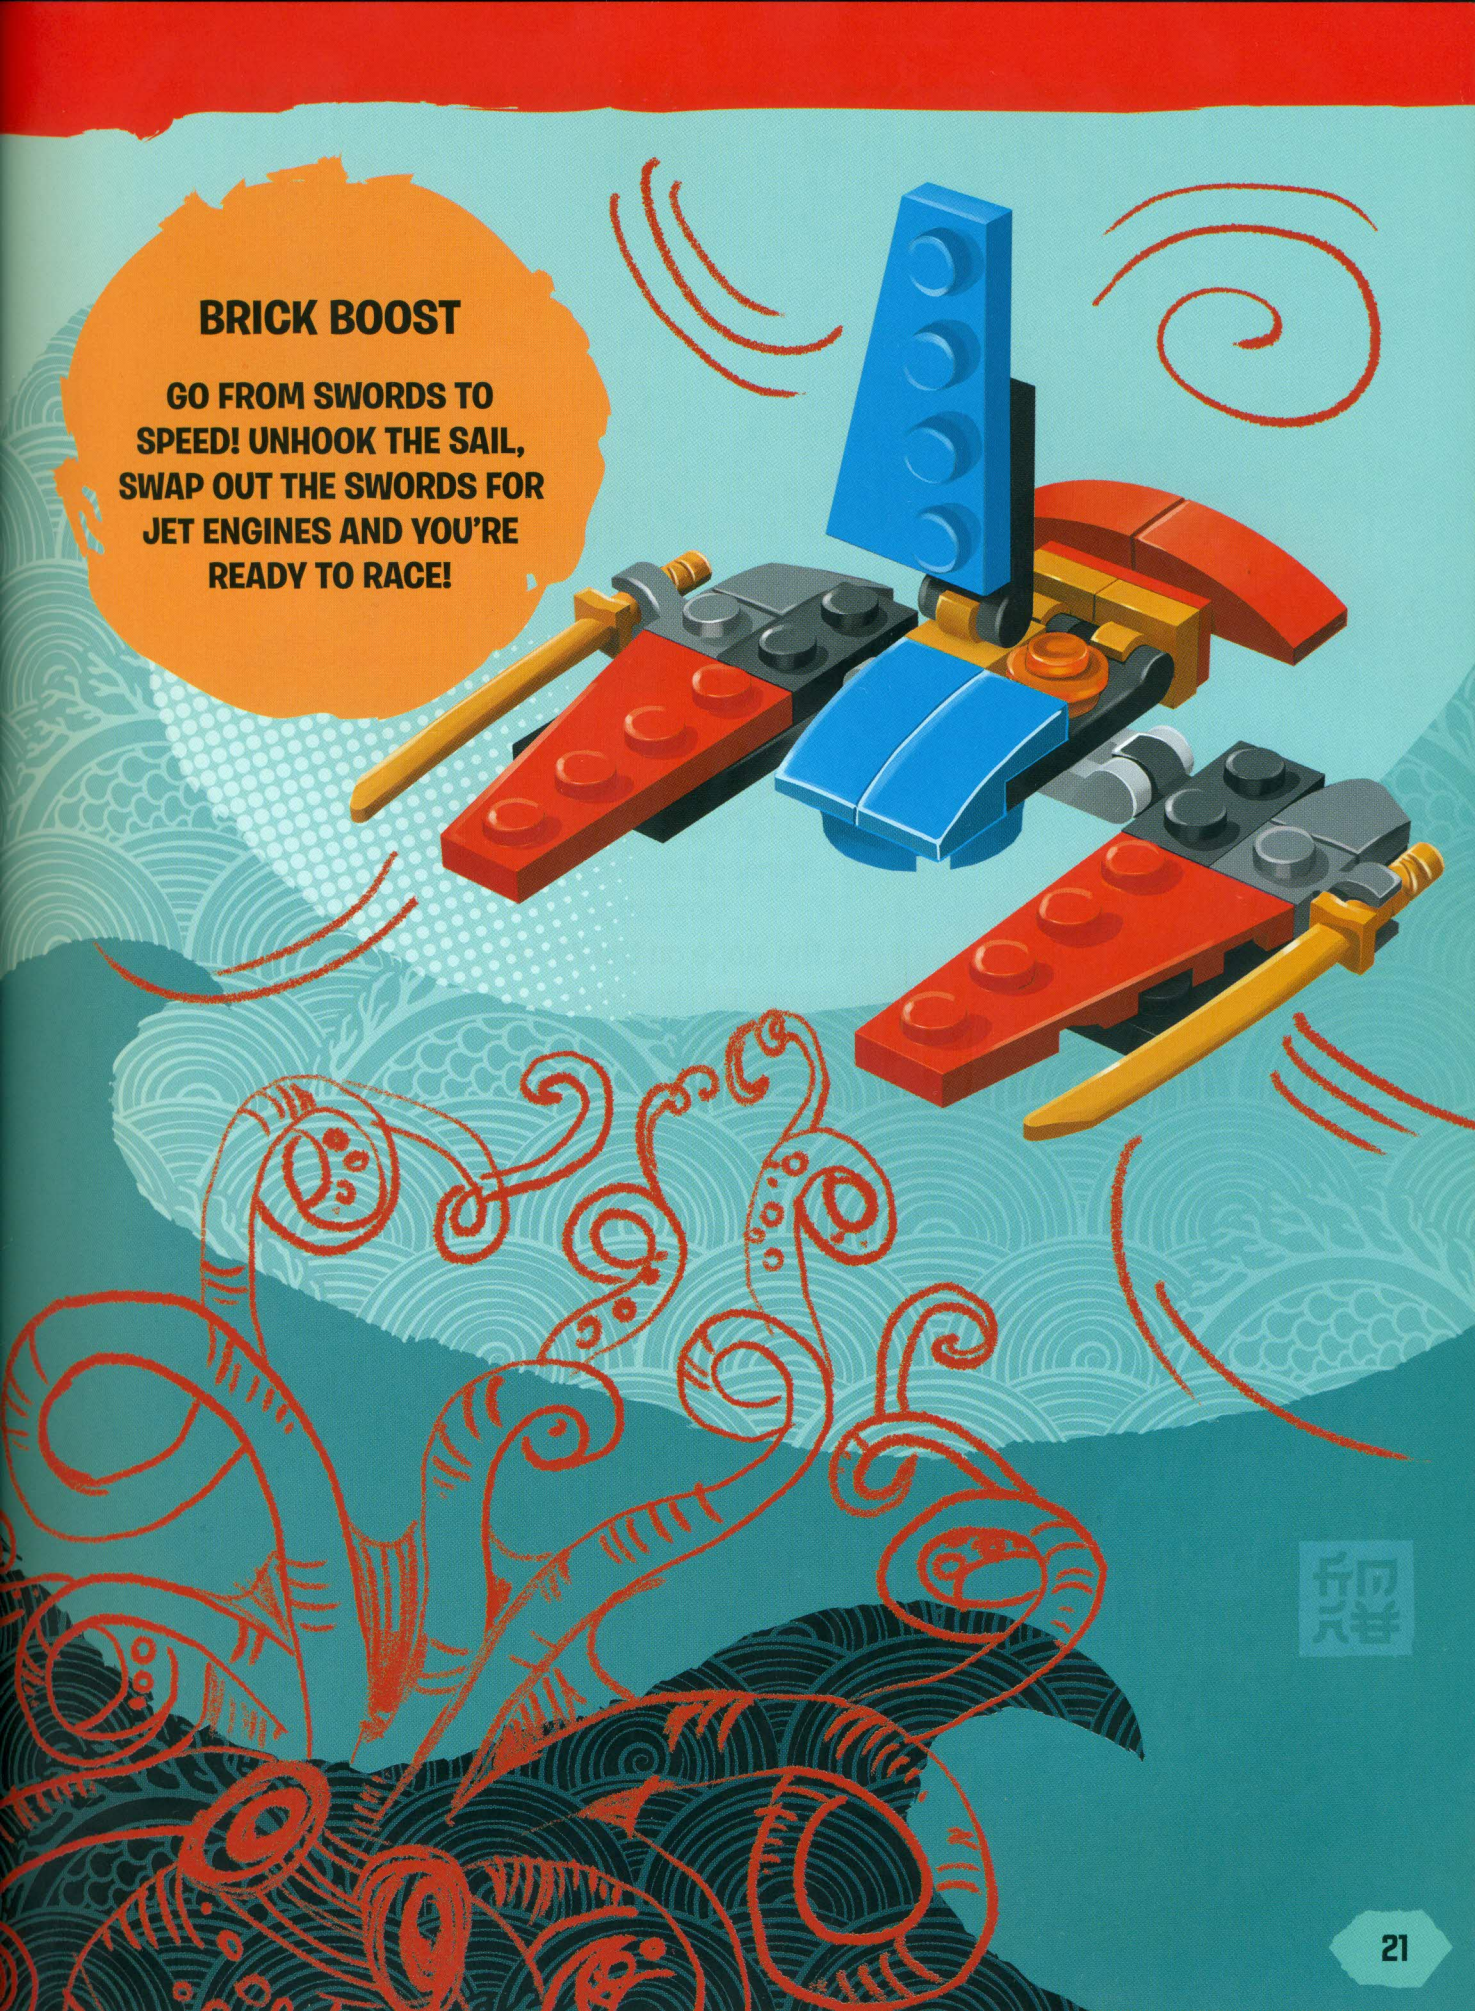

3. Finally, decide how your catamaran will be powered. Will it have an engine, sails, oars, or maybe all of the above!

Try adding swords to use as paddles.

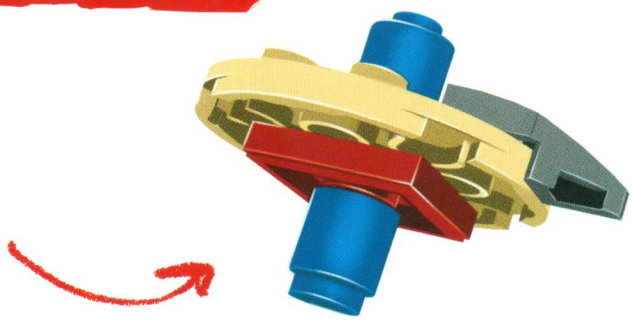

BRICK BOOST
GO FROM SWORDS TO SPEED! UNHOOK THE SAIL, SWAP OUT THE SWORDS FOR JET ENGINES AND YOU'RE READY TO RACE!

THE WHEEL OF MISFORTUNE

The ninja's opponents also love to sail. Play the game and spin the wheel to find out which legendary enemy ship you will build!

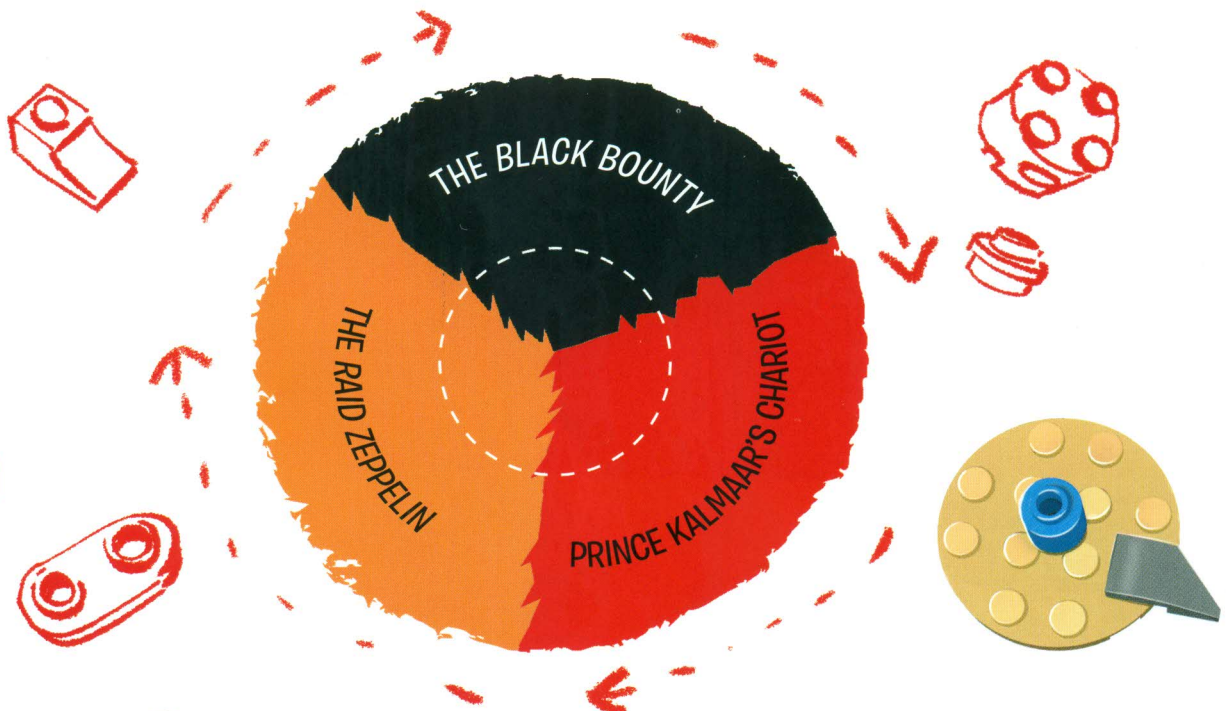

HOW IT'S DONE

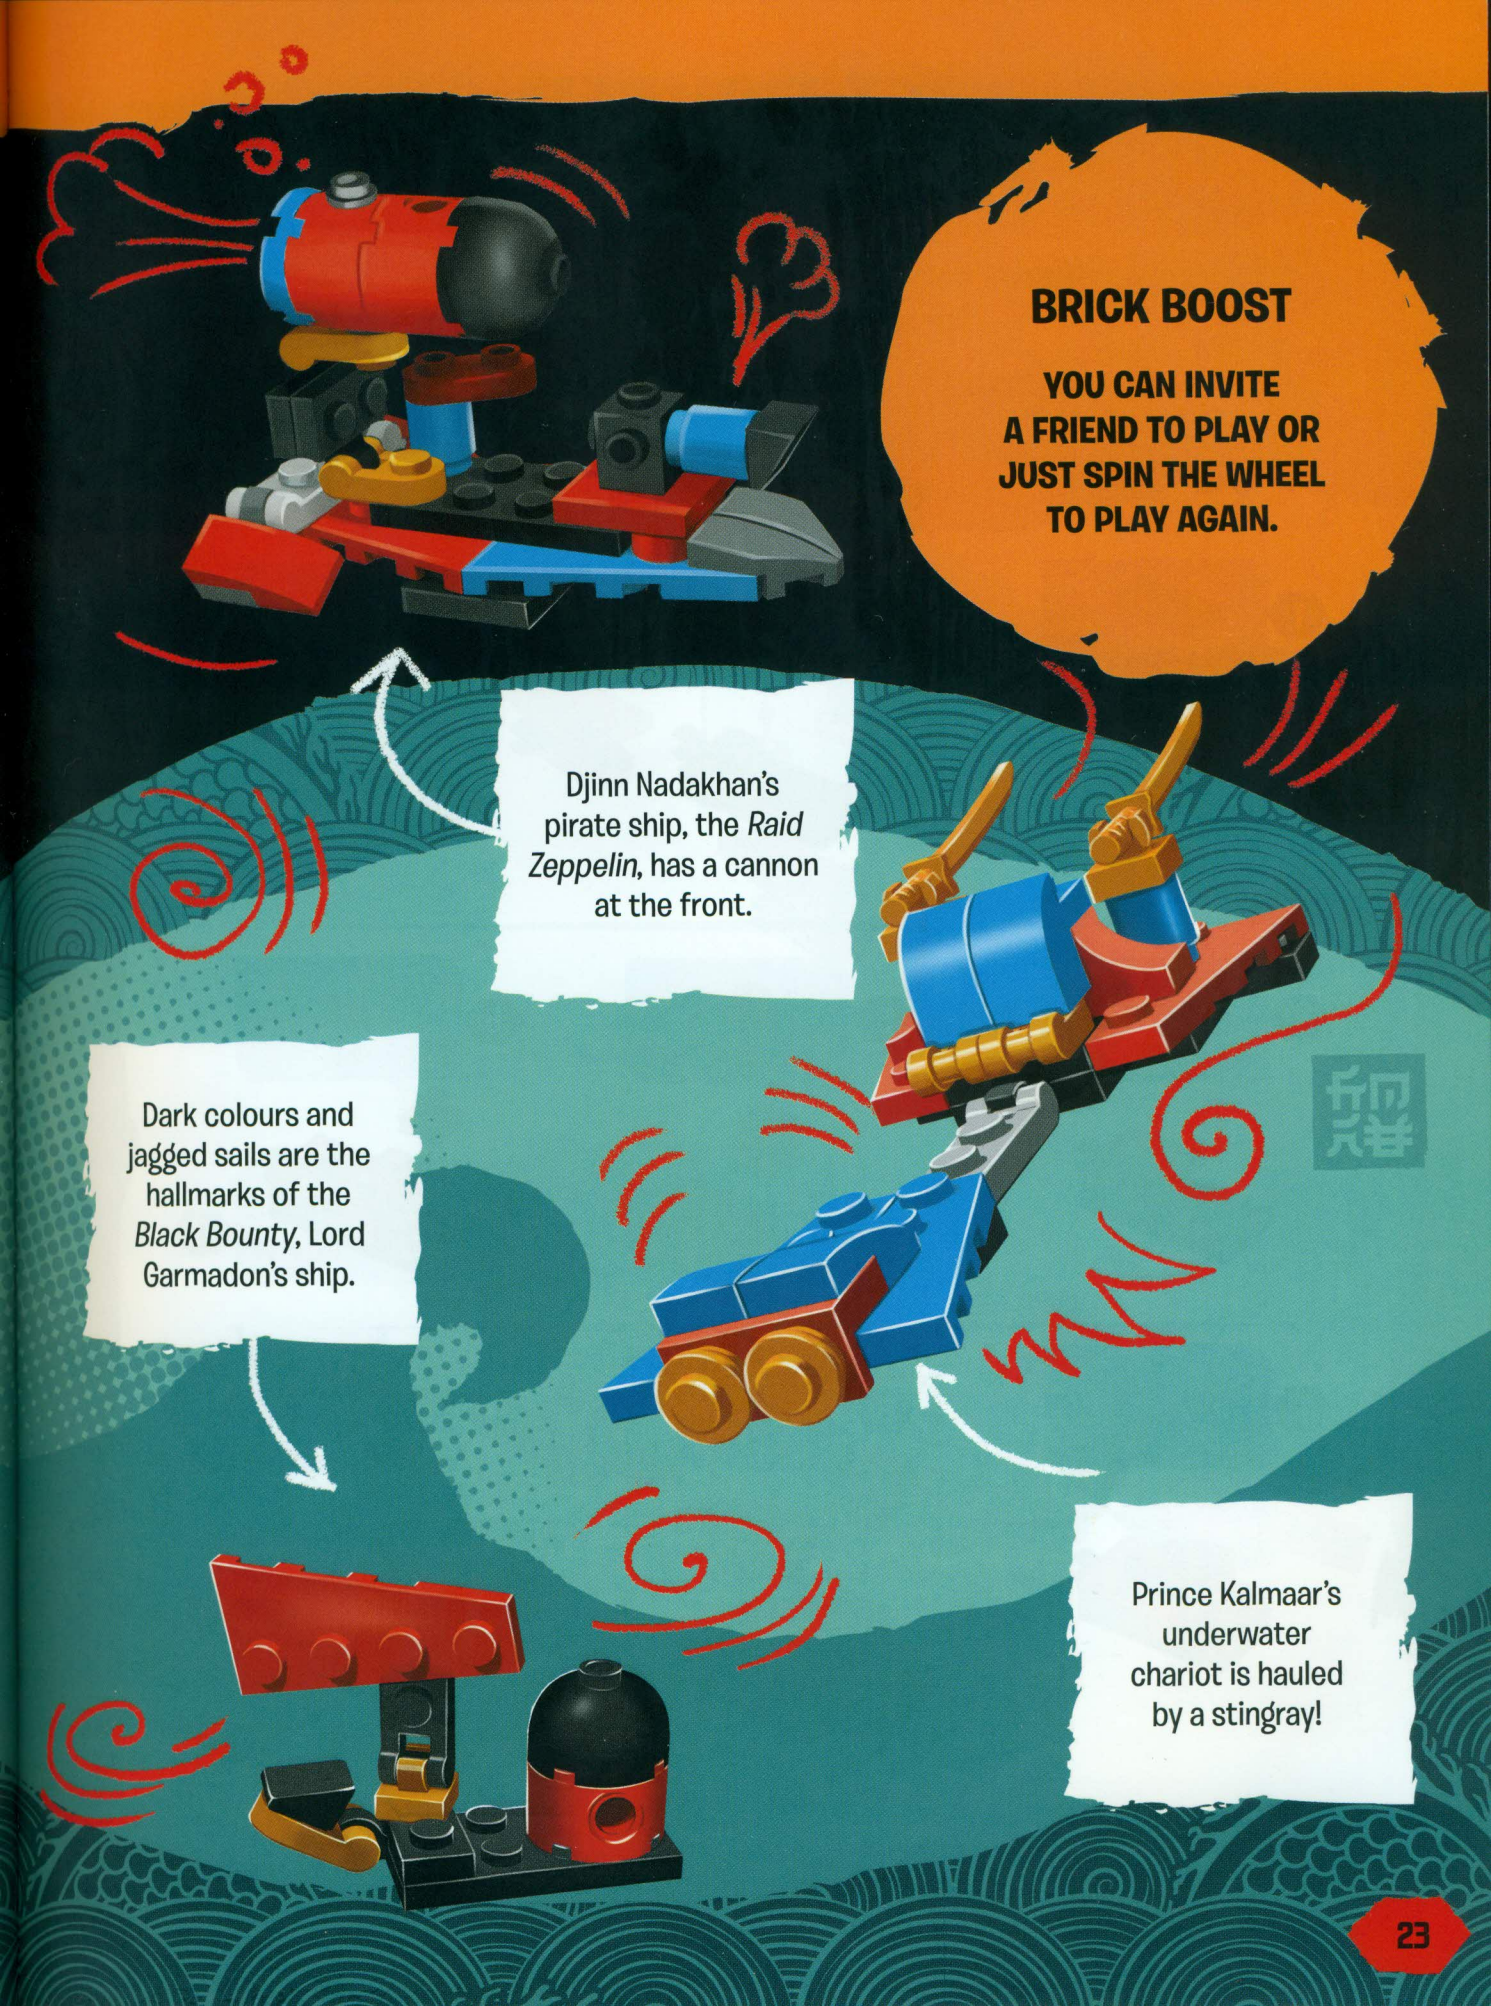

1. Build the Wheel of Misfortune. Then, place the Wheel in the center of the circle that is drawn below.

2. Spin the Wheel and let it fall. The slope on the Wheel will point to one of the ship names on the circle.

3. Build the model of the ship that the Wheel has selected for you.

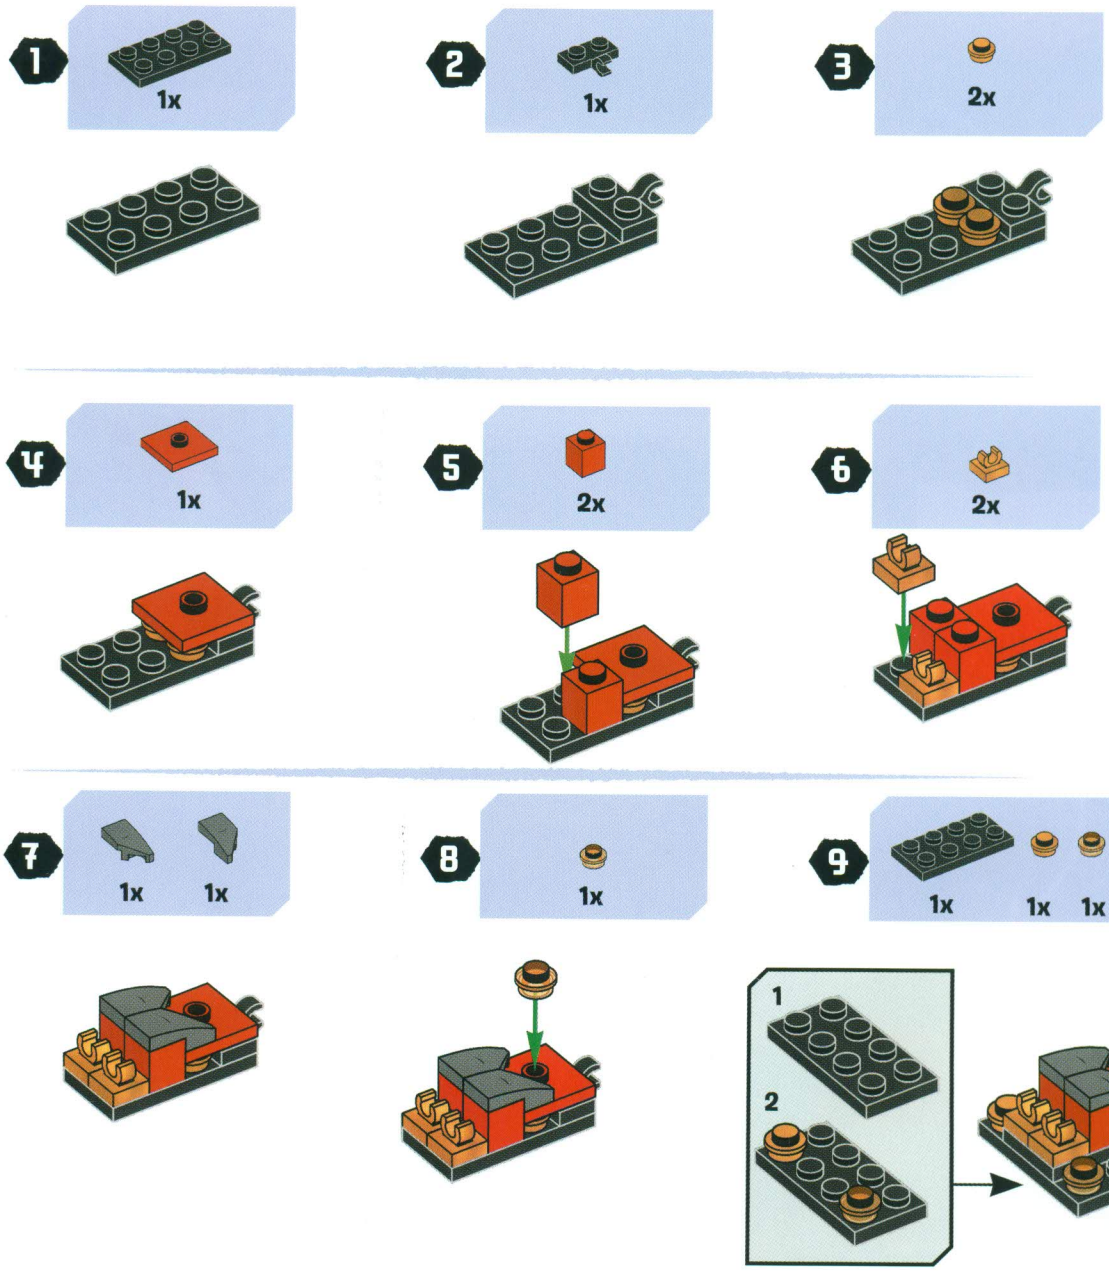

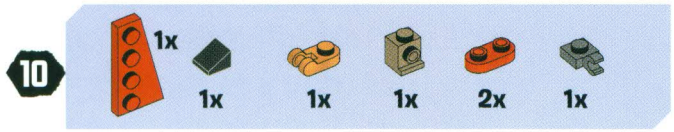

BRICK BOOST
YOU CAN INVITE A FRIEND TO PLAY OR JUST SPIN THE WHEEL TO PLAY AGAIN.
Djinn Nadakhan's pirate ship, the *Raid Zeppelin*, has a cannon at the front.
Dark colours and jagged sails are the hallmarks of the *Black Bounty*, Lord Garmadon's ship.
Prince Kalmaar's underwater chariot is hauled by a stingray!

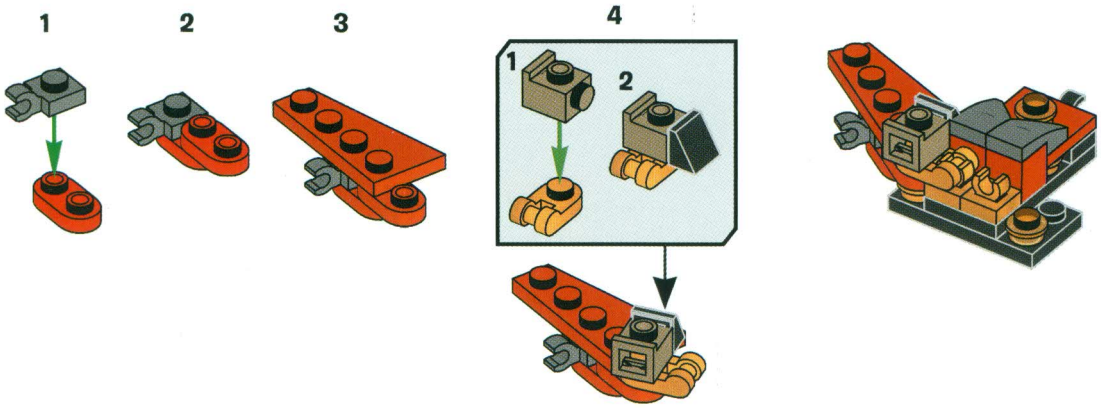

JET FIGHTER

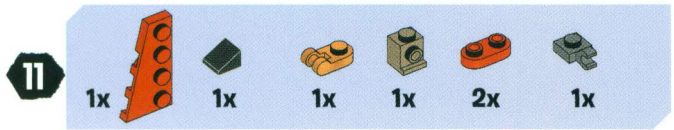

Here's how to build a super-fast jet fighter for a ninja mission in the sky.

13

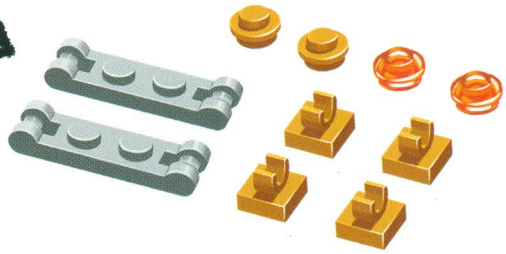

BRICK BOOST
USE BLUE BRICKS TO GIVE YOUR JET FIGHTER THE GIFT OF INVISIBILITY IN THE SKY, OR MIX RED AND BLUE PIECES TO BUILD A COMBO JET.

COOL CARS

When a ninja sits behind the steering wheel, not even the fastest of villains can escape!

HOW IT'S DONE

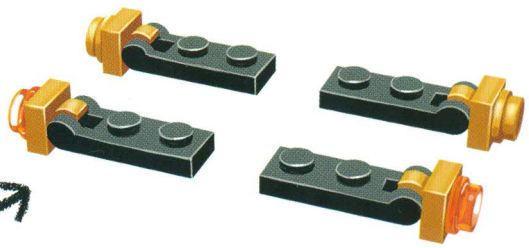

1. Gather together the pieces shown here.

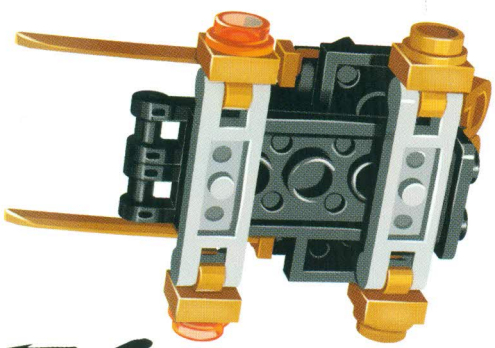

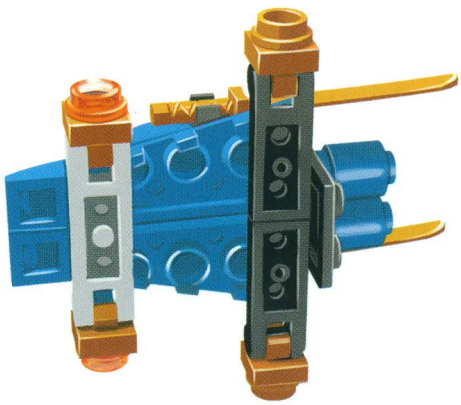

2. Connect the pieces as shown here to make two pairs of wheels.

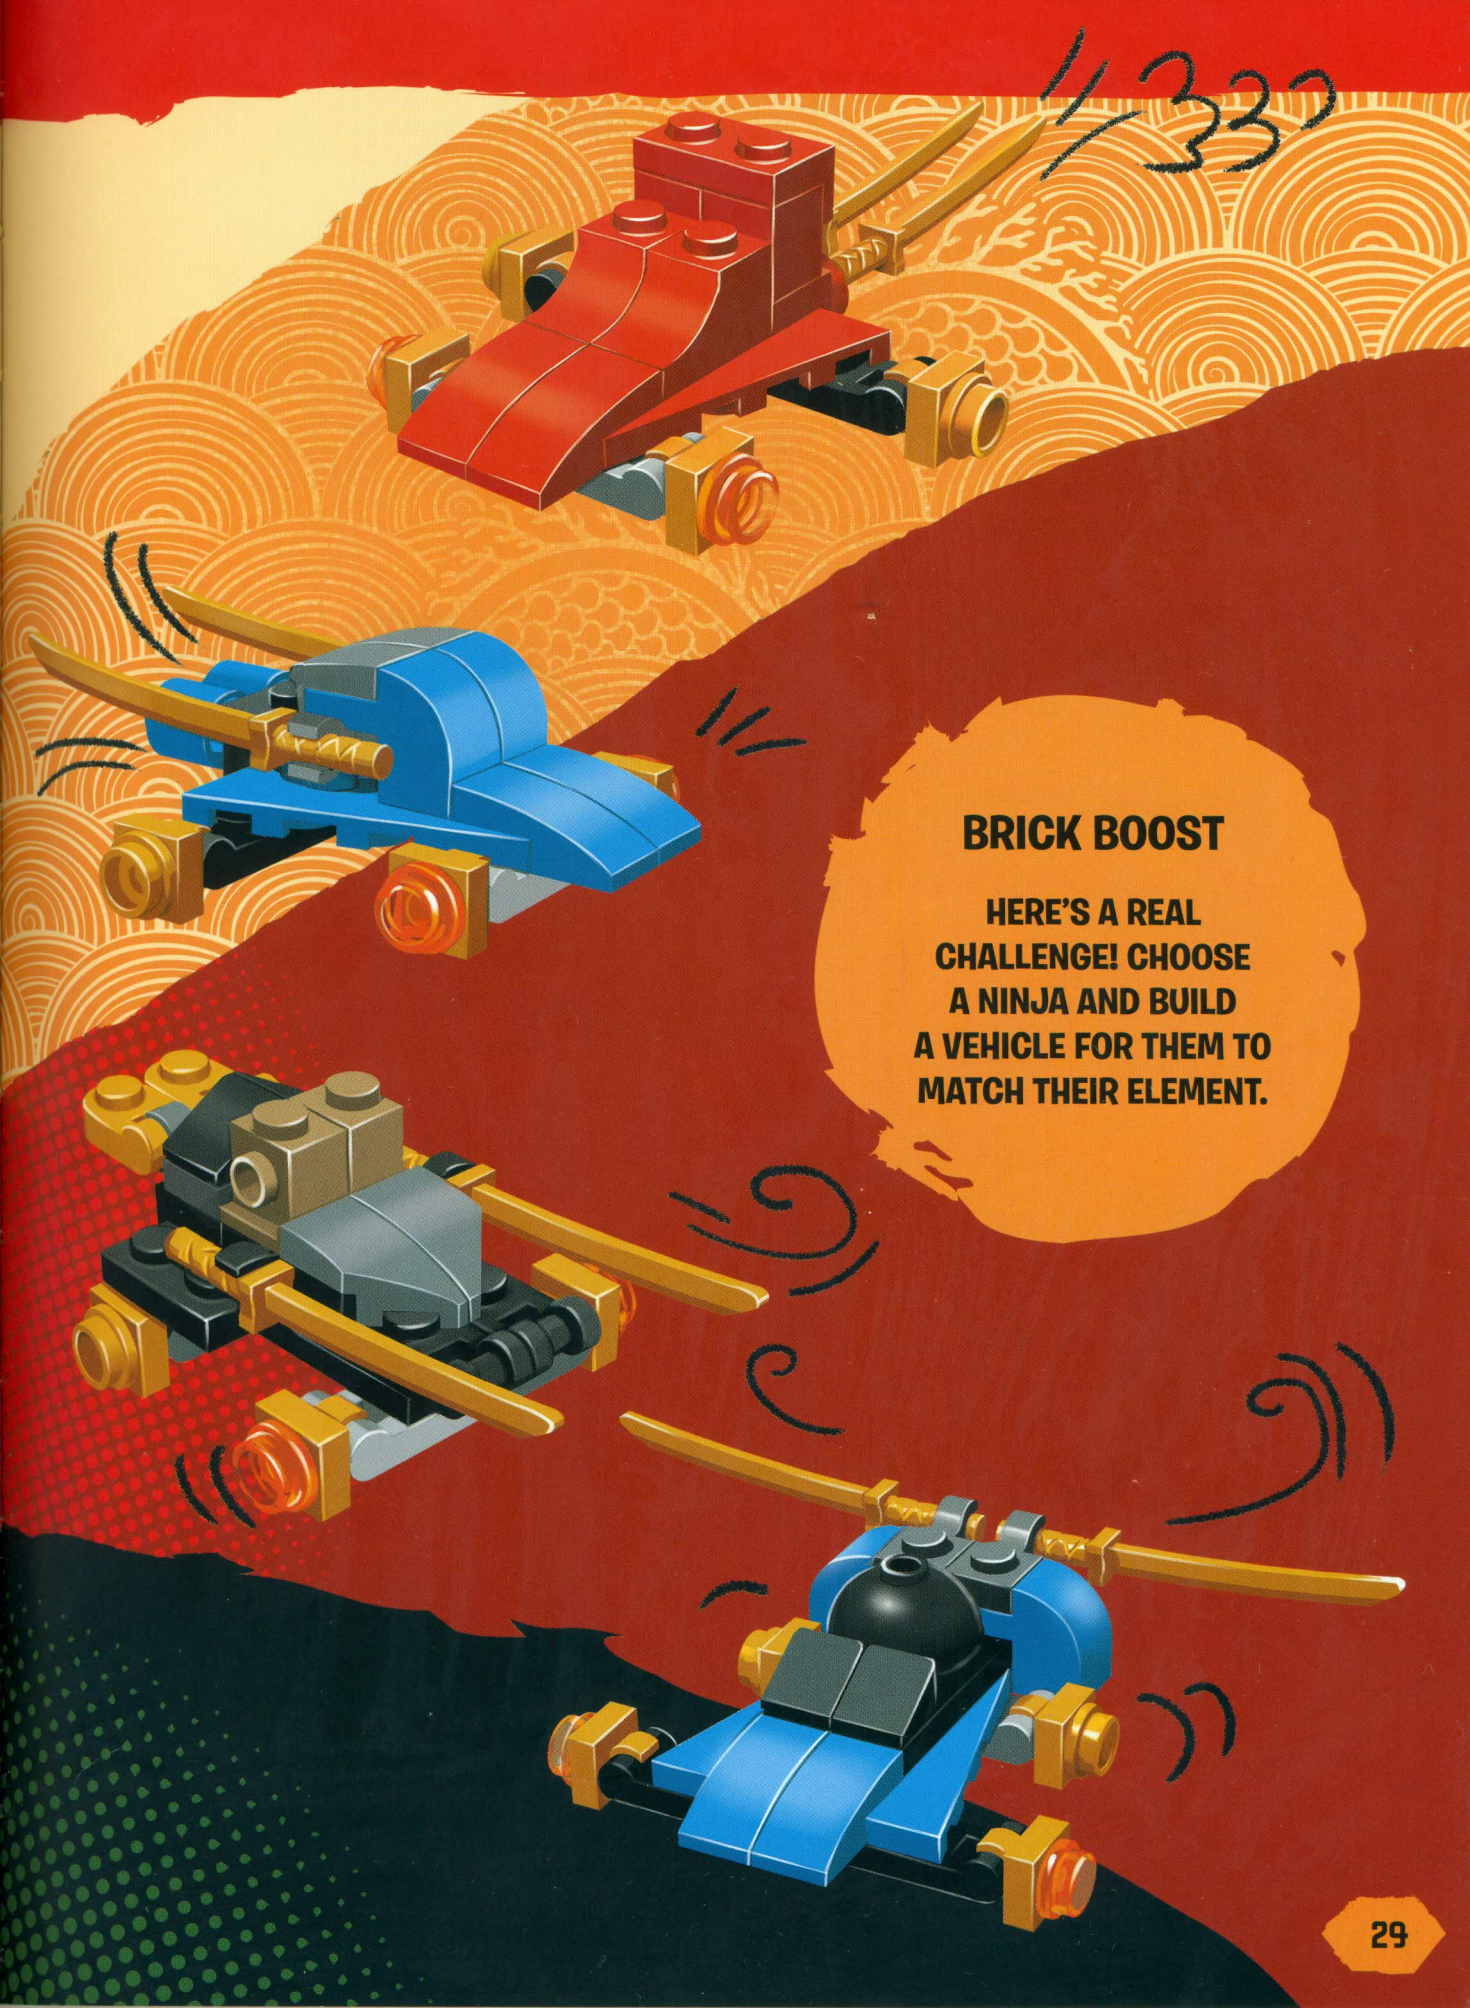

You can also use the black *plates with bars* to create axles for the wheels.

3. Use the wheels as the base for creating super-fast racing cars.

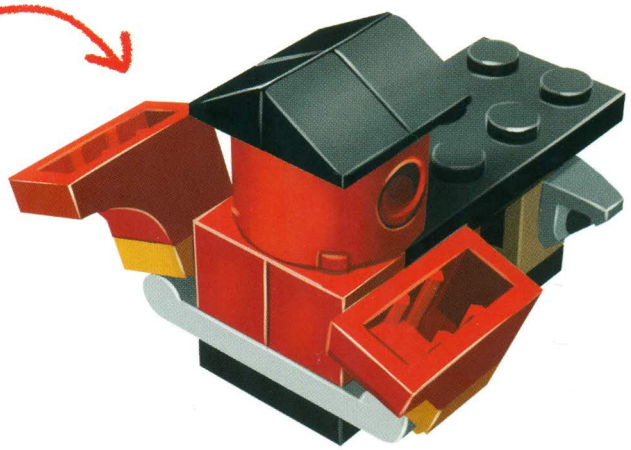

BRICK BOOST
HERE'S A REAL CHALLENGE! CHOOSE A NINJA AND BUILD A VEHICLE FOR THEM TO MATCH THEIR ELEMENT.

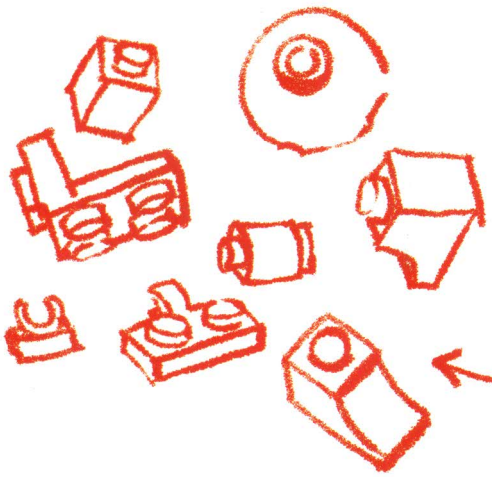

MASTER OF VEHICLES

The *Destiny's Bounty* has suffered many malfunctions, but Nya has always managed to fix it. Can you restore a ship, just like Nya?

HOW IT'S DONE

1. Build a small ship. Remember not to make it too complicated.

2. Take a close look at the model you built and then take it apart.

3. Now try to build the exact same ship again from memory.

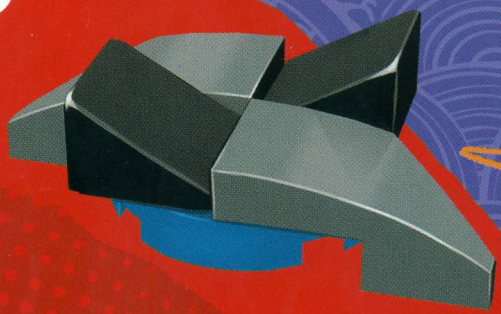

BRICK BOOST
IF YOU'VE MASTERED BUILDING A SHIP FROM MEMORY, TRY A MORE DIFFICULT TASK AND REBUILD YOUR SHIP WITH YOUR EYES CLOSED.
I LOVE FIXING THE STARBOARD ROTORS. IT'S SO RELAXING.

CHAPTER 2

AMAZING GADGETS

The ninja are gadget masters. They can use their gadgets to disarm any villain. It's time to expand their collection!

HOW MANY GADGETS CAN YOU BUILD IN FIVE MINUTES? SET A TIMER AND GIVE IT A GO.

MY FAVOURITE GADGET IS MY GAMES CONSOLE.

If you want the legendary Samurai X to join your collection of models, jump to **page 34**.
To learn how to build a Double Power Mech, see **page 38**.
If you are planning a mission where drones will come in handy, see **page 48**.

THE WALKING LEGEND

Samurai X is a combat exosuit Nya wears while protecting the land of Ninjago. Build a similar model to strike fear into the hearts of villains everywhere.

HOW IT'S DONE

1. Start by building armour that can withstand a clash against the toughest enemy.

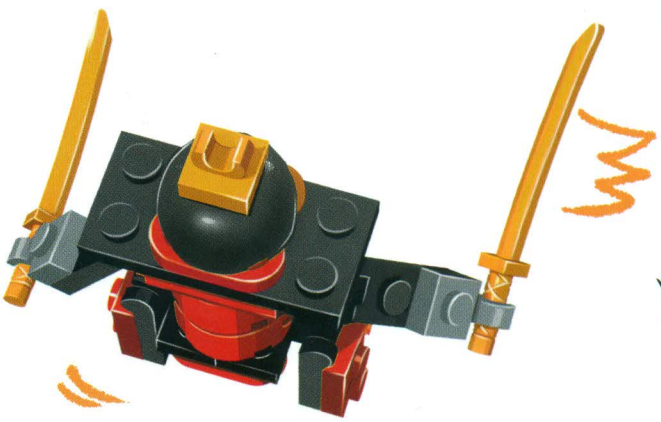

2. Add powerful arms to hold heavy weapons.

3. Build strong legs so the mech will be able to walk long distances.

4. Finally, add shoulder pads and a helmet just like the ones worn by the original Samurai X.

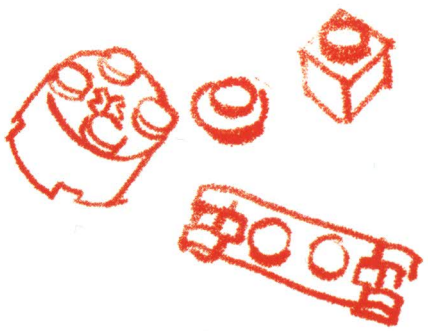

BRICK BOOST
USE THE REMAINING PIECES TO BUILD A SHIELD FOR YOUR MECH AND MAKE IT INDESTRUCTIBLE!

HIGH TECH MECH

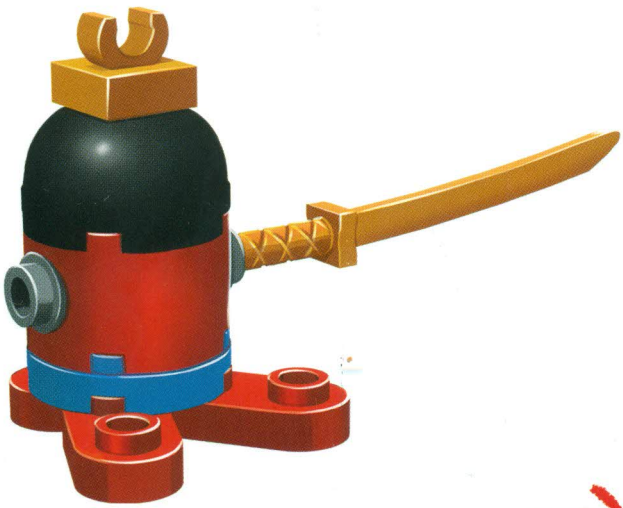

There are all types of mechs. Some have a million different functions while others have one signature trick. It all depends on the designer's imagination!

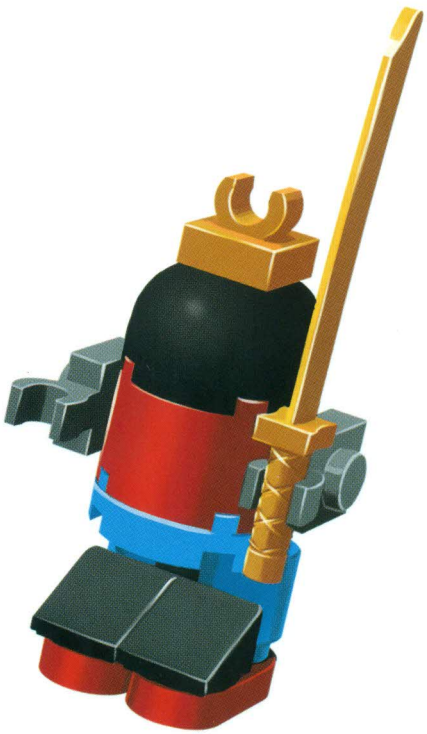

HOW IT'S DONE

1. Spread all the pieces included in this set out in front of you.

2. Select 10 pieces and use them to build a simple mech.

3. Now try using 15 pieces to create a more advanced mech.

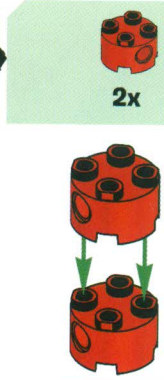

BRICK BOOST
TAKE IT TO THE NEXT LEVEL AND BUILD DIFFERENT MECHS. INCREASE THE NUMBER OF PIECES USED EACH TIME, UNTIL THERE ARE NO PIECES REMAINING.
WOW! A MECH LIKE THAT COULD DEFEAT AN ENTIRE ARMY OF VILLAINS!

DOUBLE-POWER MECH

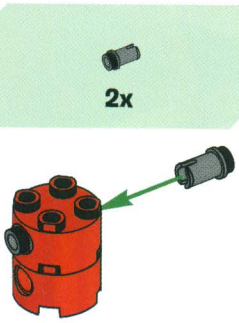

If Nya and Kai designed a mech together, it would definitely look like the one below. A mech that combines the pieces of water and fire will impress everyone!

DOUBLE-POWER MECH

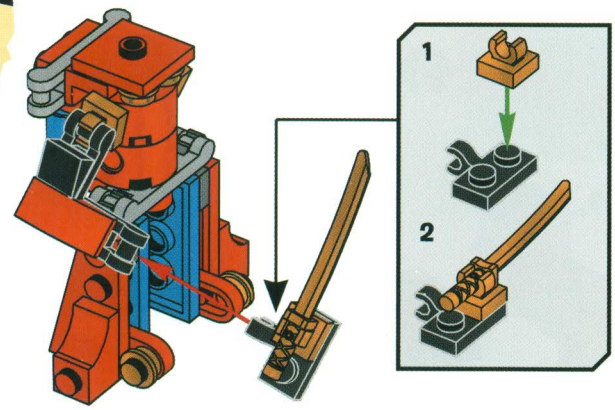

BUILDING INSTRUCTIONS (CONTINUED)

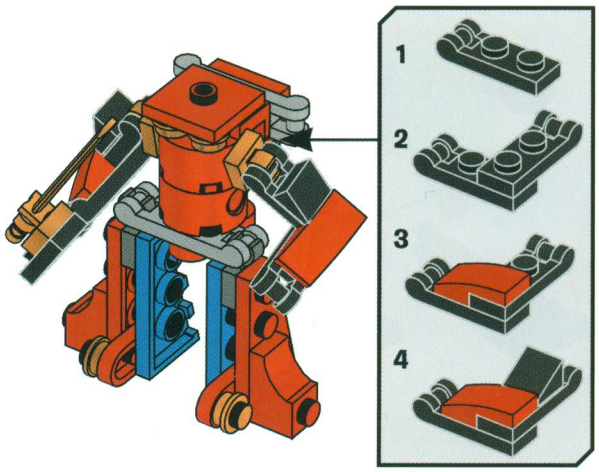

15

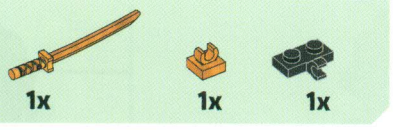

16

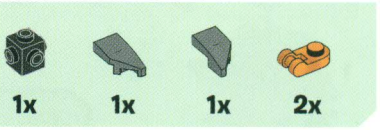

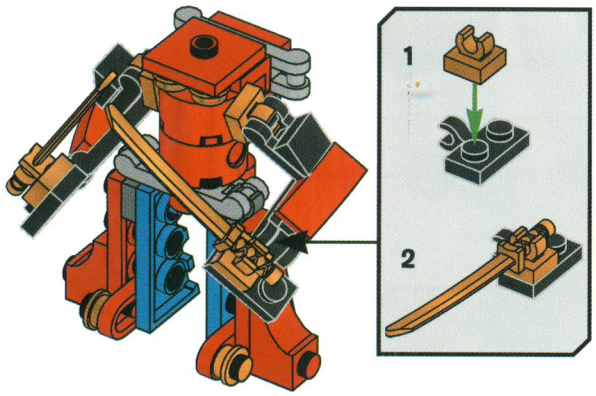

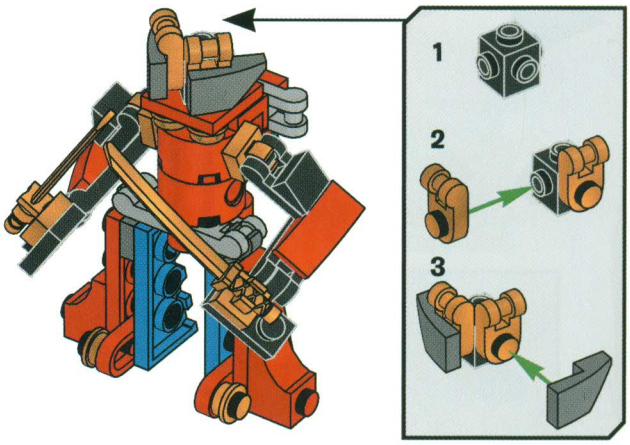

17

18

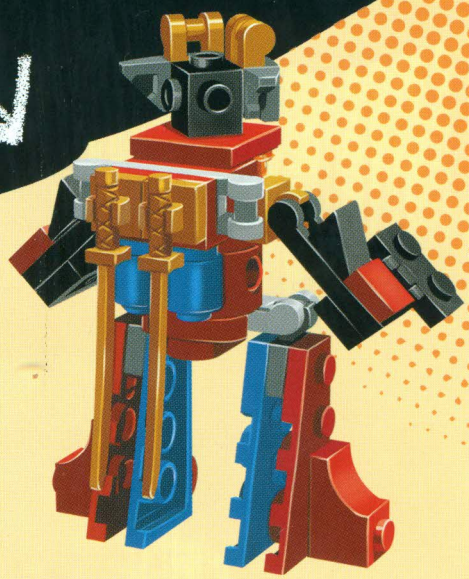

BRICK BOOST

WHEN NOT IN USE, YOU CAN ATTACH THE MECH'S SWORDS TO THE JETPACK SO THEY'RE EASY TO REACH. WHAT OTHER GADGETS CAN YOU BUILD TO STORE IN THE JETPACK?

FEARLESS MECH

Will your mission be at sea, on land or in Ninjago City? Wherever you are, PIXAL's mechs have you covered.

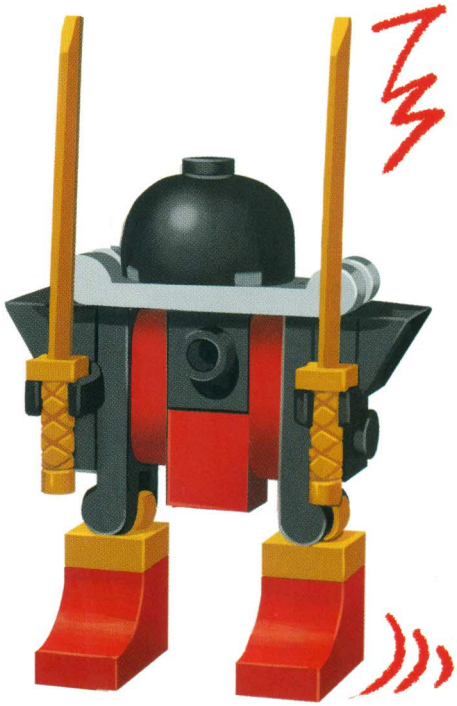

HOW IT'S DONE

1. Lay out all the pieces included with this set.

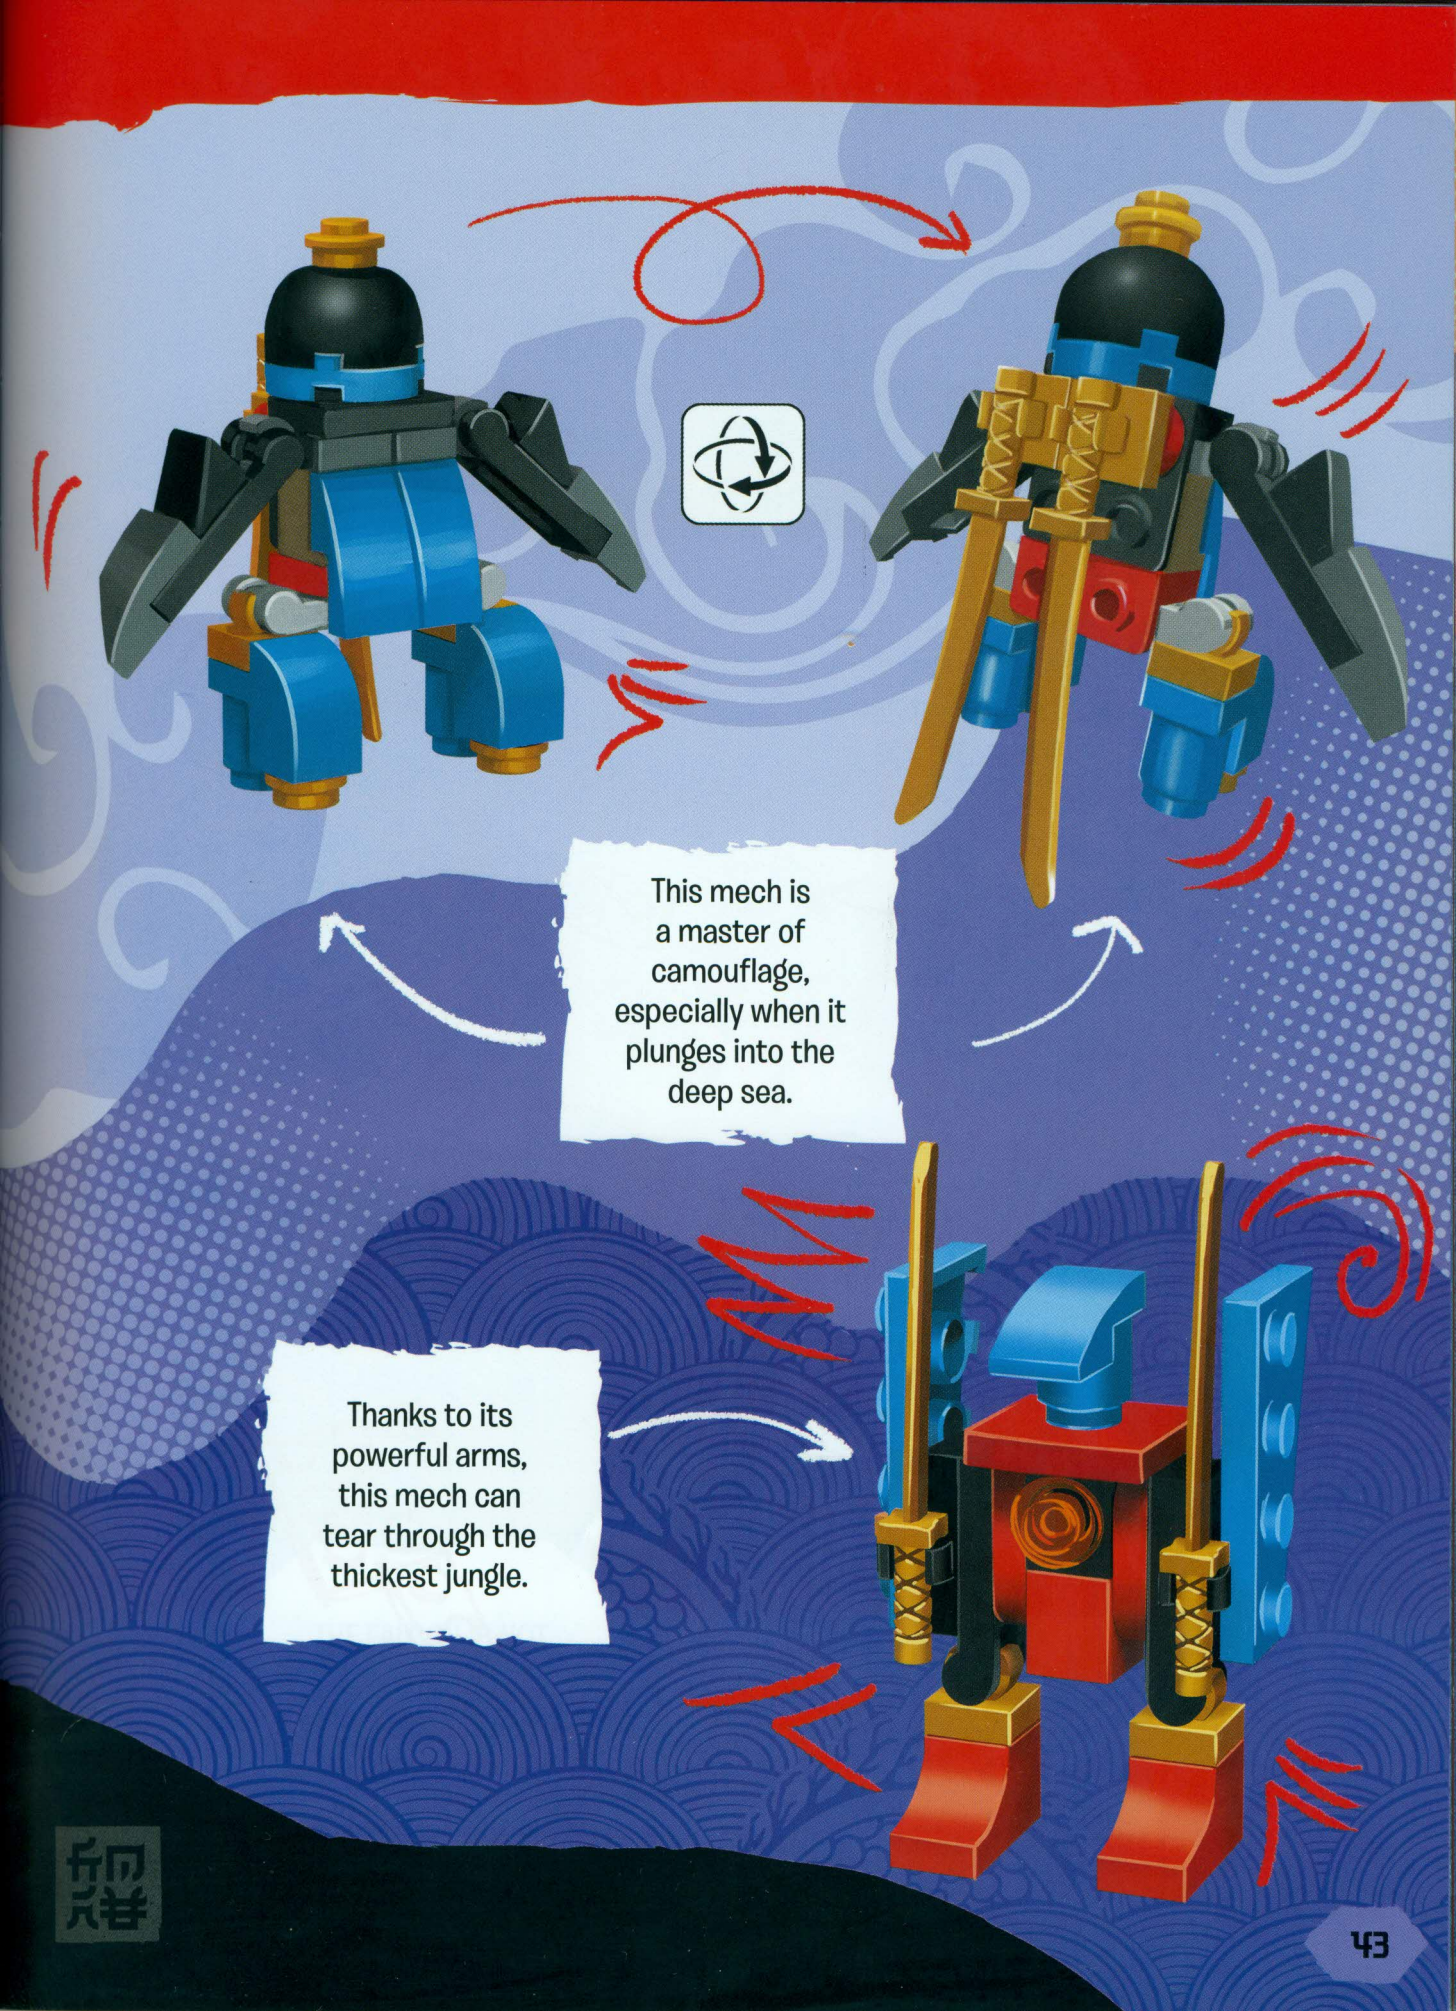

2. Choose the mech you like best.

- SUPERFAST COMBAT MECH
- ULTRASILENT RECON MECH
- ARMOURED AMPHIBIAN MECH

3. Build a mech that matches the name you've chosen.

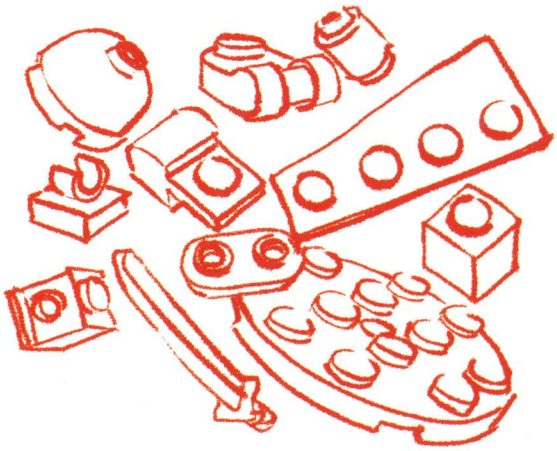

This mech is a master of camouflage, especially when it plunges into the deep sea.
Thanks to its powerful arms, this mech can tear through the thickest jungle.

THE MECHANICAL MENAGERIE

As well as building Zane, Dr Julien invented a mechanical falcon. This flying robot became the ninja's scout. Can you design a similar model?

HOW IT'S DONE

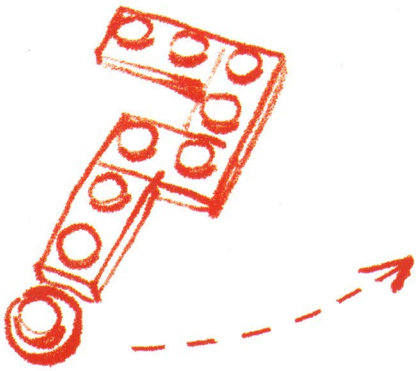

1. Put all the pieces included in this set in front of you.

2. Close your eyes and randomly select one of the pieces.

3. Now use this piece to start off your mechanical bird creation.

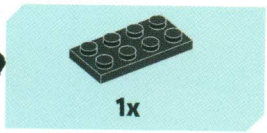

BRICK BOOST
WHAT OTHER MECHANICAL ANIMALS CAN YOU BUILD?
THE FALCON IS NOT ONLY A SCOUT, IT'S ALSO A GOOD FRIEND!

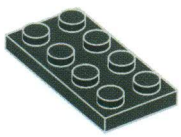

SUPERSCOUT DRONE #1

Drones are small aircraft that can be piloted remotely. That makes them very handy for secret missions!

SUPERSCOUT DRONE #2

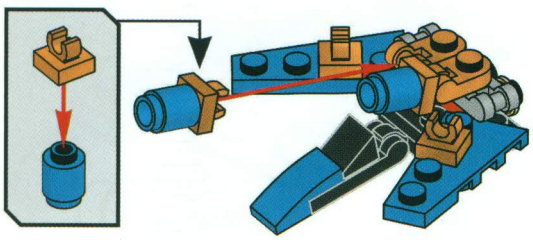

Two drones are better than one! After building the drone on the previous page, use your remaining pieces to build this one.

BUILDING INSTRUCTIONS

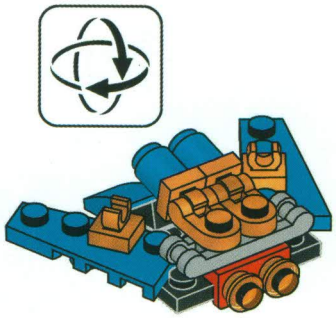

8

9

BRICK BOOST

INVITE A FRIEND TO BUILD WITH YOU. HIDE A RED PIECE IN ONE HAND AND BLUE PIECE IN THE OTHER. THEN, ASK YOUR FRIEND TO PICK A HAND. THE COLOUR THEY CHOOSE WILL BE THE COLOUR OF DRONE YOU BUILD TOGETHER.

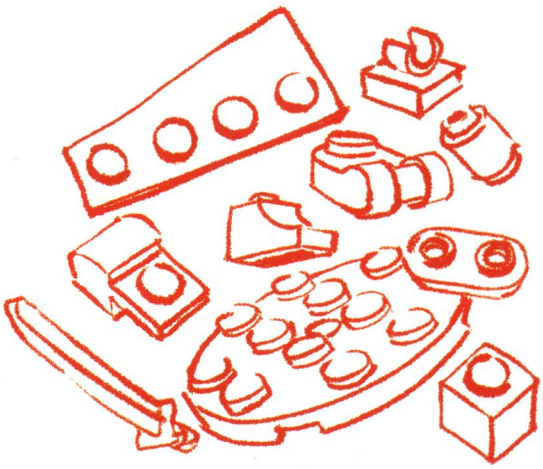

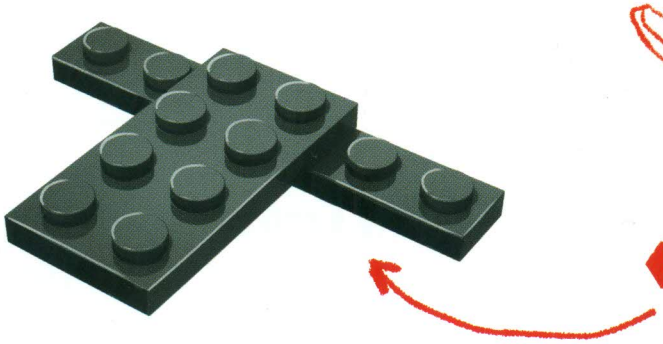

SPECIALIZED DRONES

Drones can be used for all sorts of tasks, from taking aerial photos to delivering the ninja's lunch!

HOW IT'S DONE

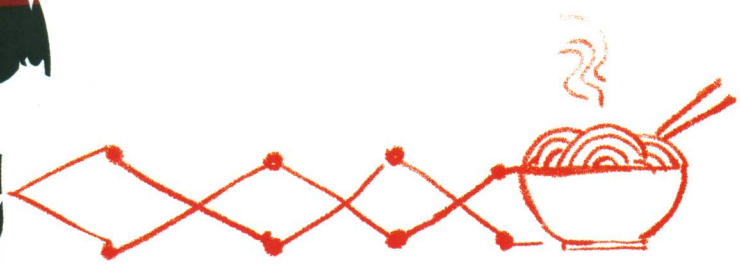

1. Lay out all the pieces included with this set.

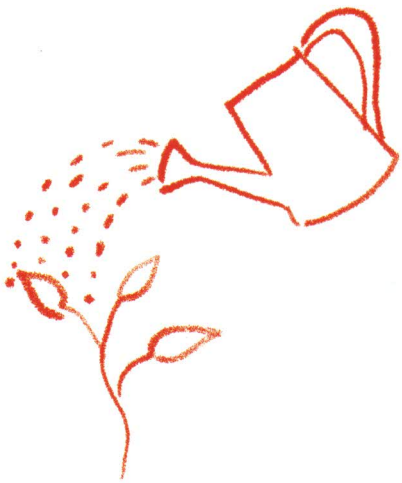

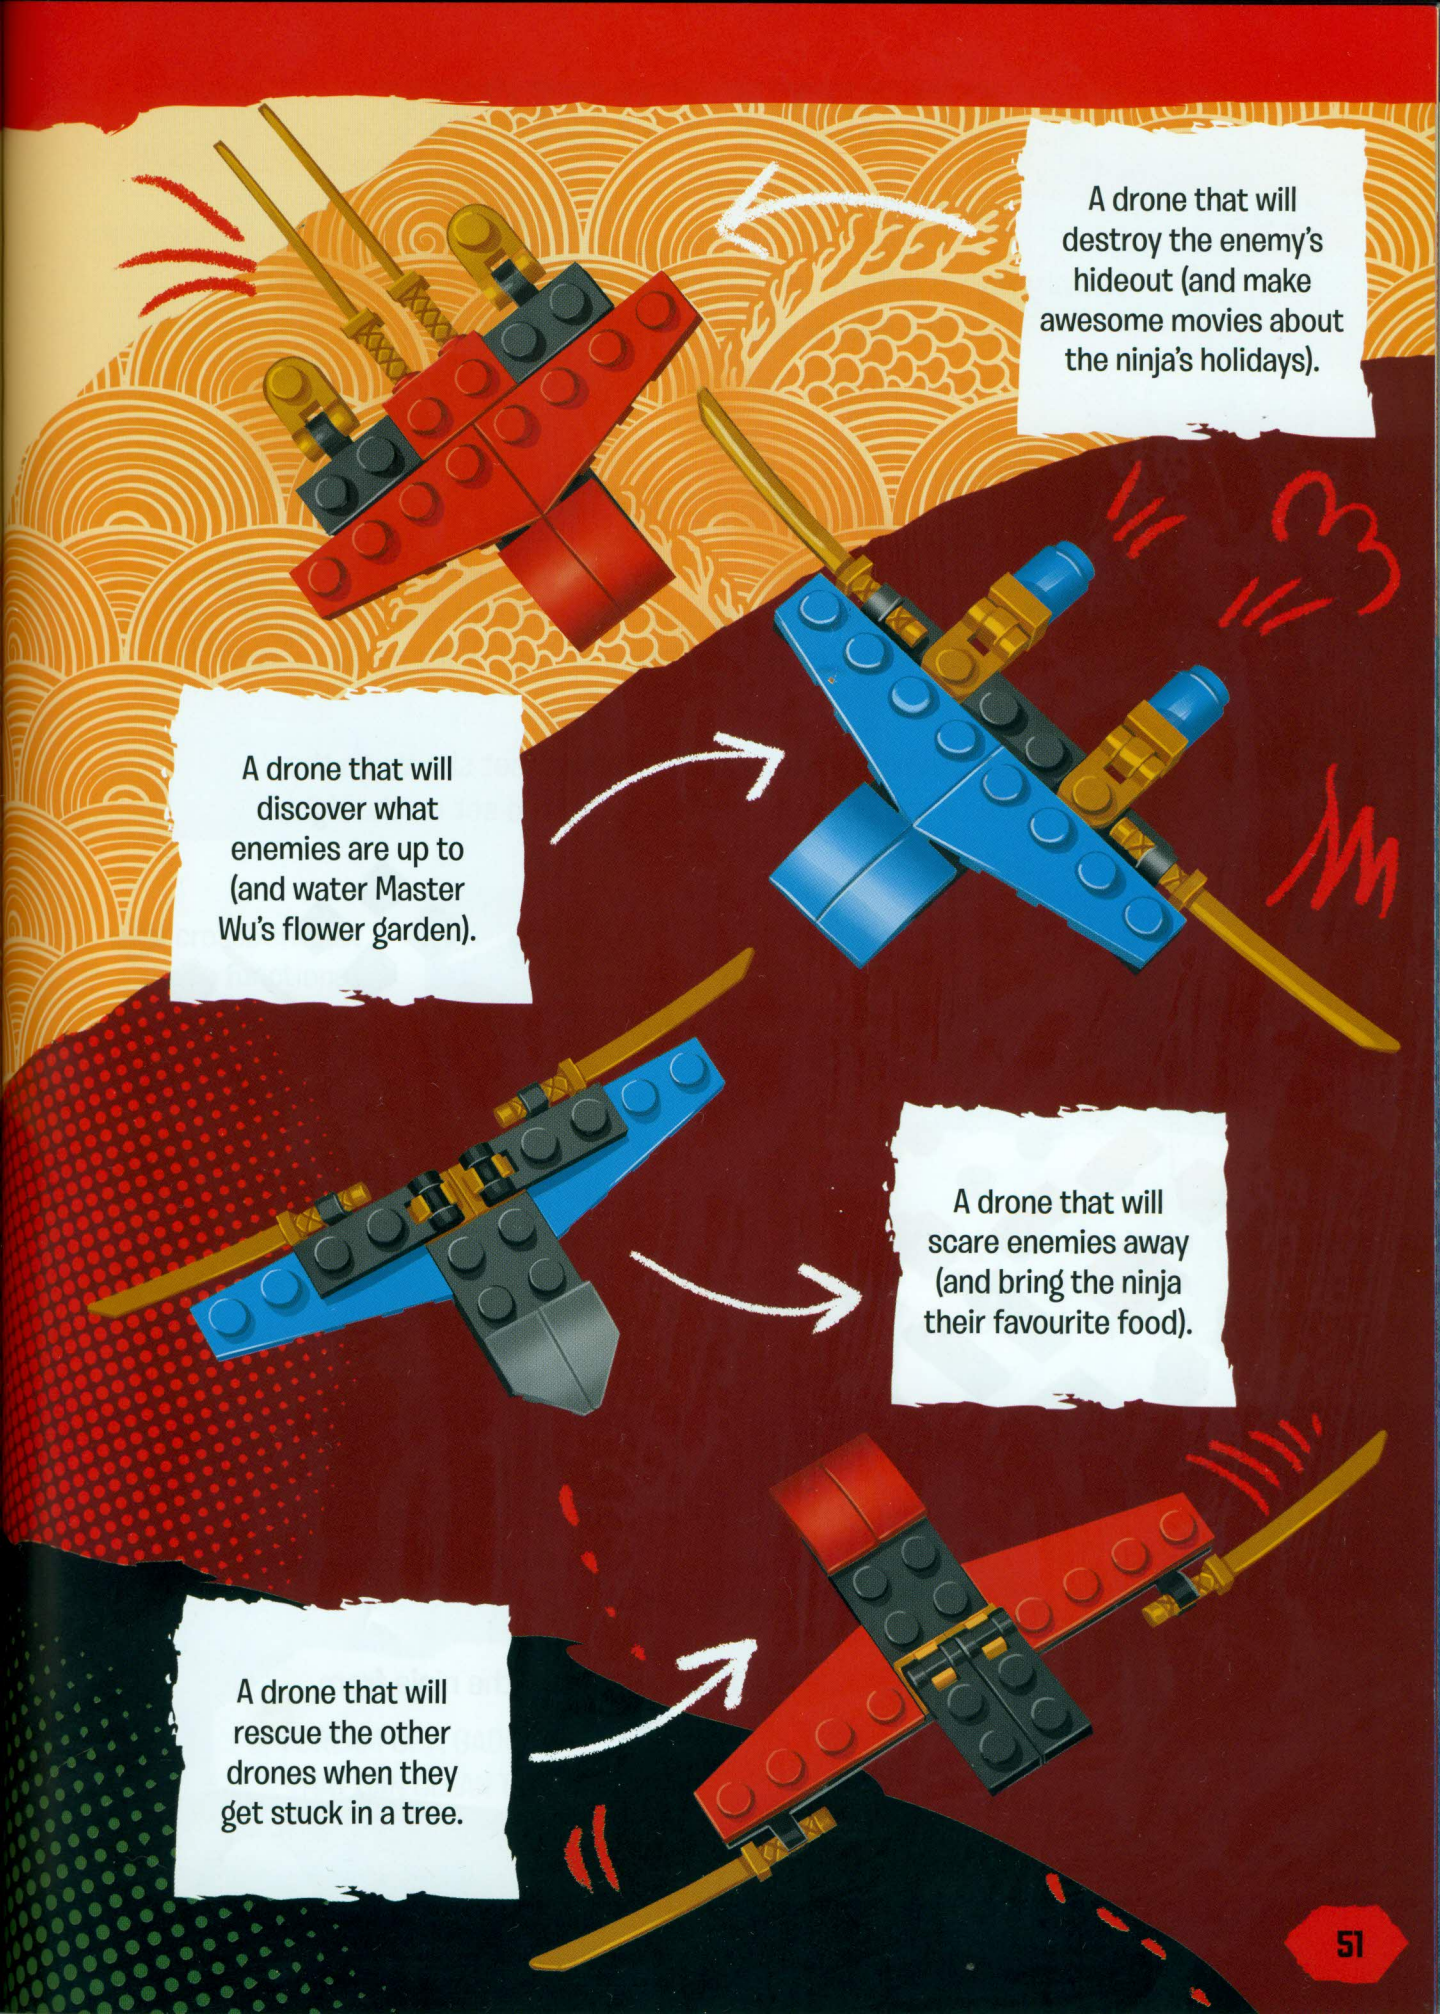

2. Connect the plates as shown in the picture to create the base of your drone.

3. Use the other pieces to give your drone cool features and accessories.

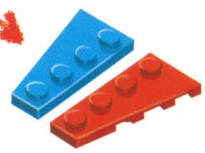

A drone that will destroy the enemy's hideout (and make awesome movies about the ninja's holidays).
A drone that will discover what enemies are up to (and water Master Wu's flower garden).
A drone that will scare enemies away (and bring the ninja their favourite food).
A drone that will rescue the other drones when they get stuck in a tree.

GADGET FACTORY

**It only takes a little imagination to build a supergadget.
Use the elements to try building your own!**

HOW IT'S DONE

1. Place two *angular plates* of different colours in front of you. Close your eyes, shuffle the pieces, and choose one of them.

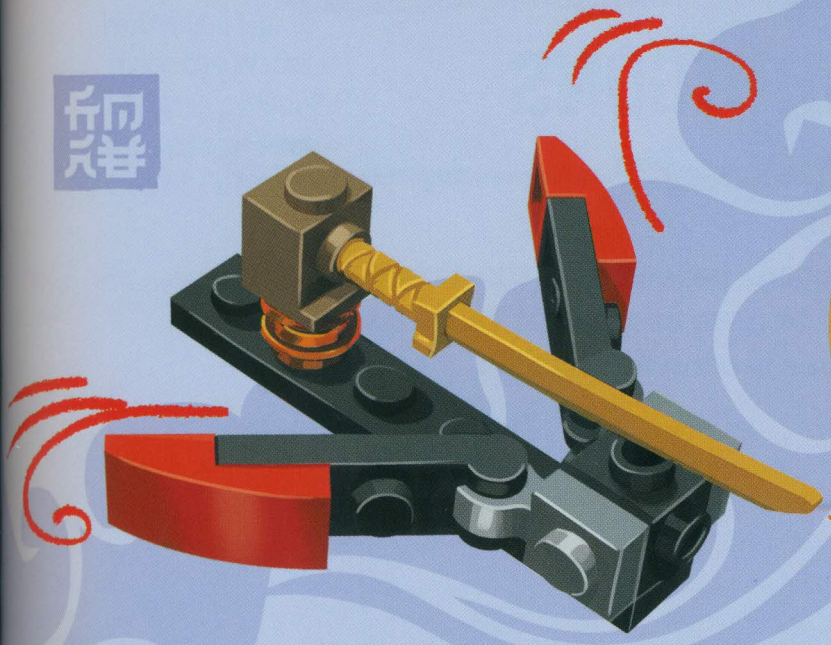

2. If you've selected the blue plate, use the element set shown on the left for your build. If you have the red plate, use the set on the right.

3. Build a supergadget for the ninja from the selected set.

BRICK BOOST

MAKE KAI'S DREAM COME TRUE AND BUILD A GADGET THAT FUNCTIONS AS BOTH A FLAMETHROWER AND A CLEANING DEVICE.

A crossbow that also functions as a stand for antique swords.

A gadget that looks like nunchucks can also be a jump rope.

I DREAM OF A GADGET THAT CAN CLEAN THE DISHES FOR ME.

CHAPTER 3

DRAGONS

More than once, dragons have helped the ninja get out of trouble. It's good to have as many of these amazing creatures around as possible.

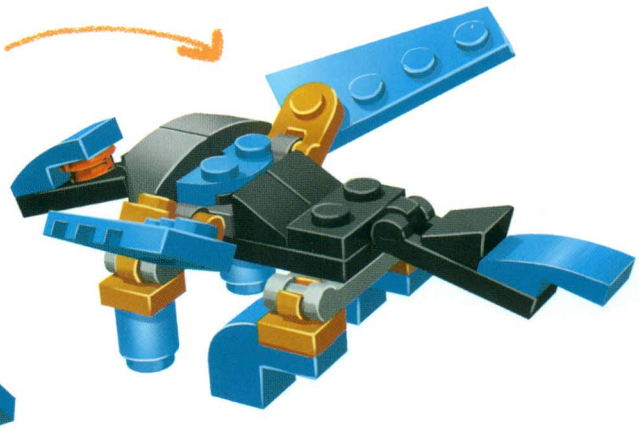

Would you like to meet the Water Dragon in person? Easy peasy! Just check out **page 56**.
To learn how to build a dragon that combines the powers of several elements, see **page 60**.

WATER DRAGON

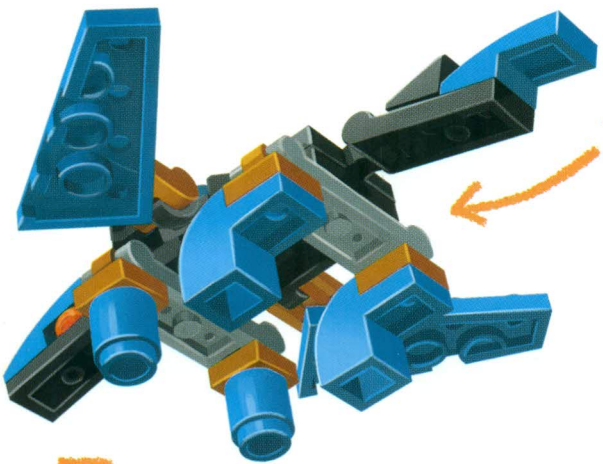

Summoning an elemental dragon can be a real challenge, as the ninja have discovered many times. Take this challenge to build your own elemental Water Dragon.

HOW IT'S DONE

1. Start with building the dragon's torso.

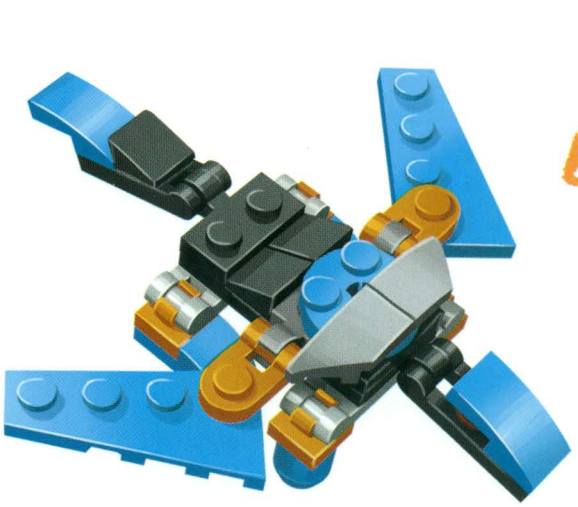

2. Build a long tail covered with scales and attach it to the torso.

3. Build legs that will help your dragon run fast.

4. Add strong wings that will allow the dragon to take to the skies.

5. Finally, build a movable neck and head.

BRICK BOOST
CAN THE WATER DRAGON BREATHE FIRE? SURE! ALL YOU HAVE TO DO IS CONNECT HIS HEAD TO A RED ELEMENT.
SUMMONING AN ELEMENTAL DRAGON IS A PIECE OF CAKE. YOU JUST HAVE TO ... OVERCOME ALL YOUR FEARS.

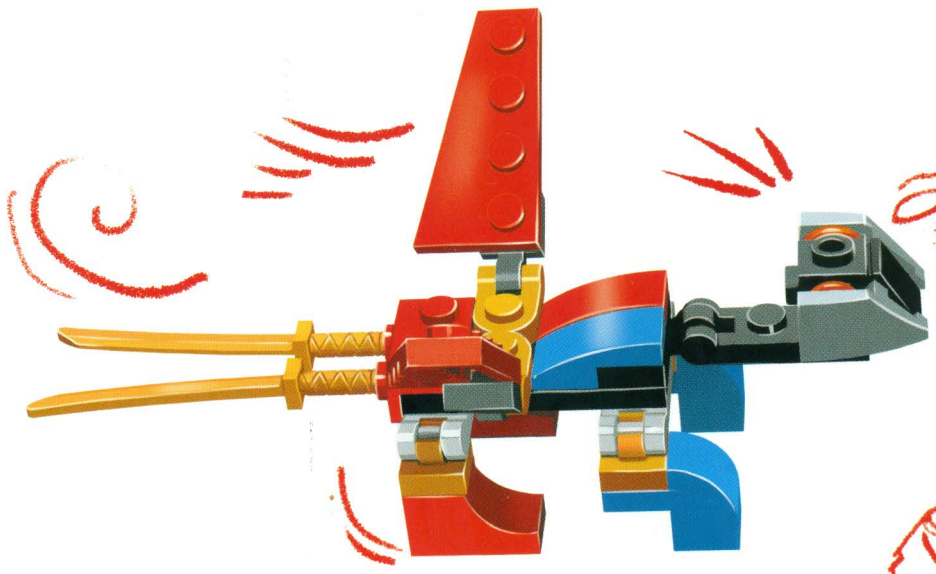

ONE-OF-A-KIND DRAGON

If you could summon your own dragon like the ninja, what would your dragon look like? It's time to find out!

HOW IT'S DONE

1. Choose three traits that you want your dragon to have. Traits could include:

- LONG NECK LIKE A GIRAFFE'S
- MORE THAN ONE HEAD
- POWERFUL WINGS
- LONG, THRASHING TAIL
- PROTECTIVE BACK ARMOUR
- SHORT-BUT-QUICK LEGS
- MULTI-COLOURED SCALES

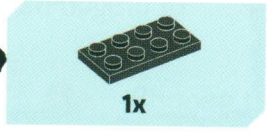

2. Once you've chosen the traits you want your dragon to have, use the pieces in this set to bring it to life!

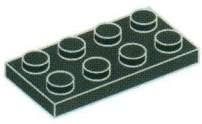

This is *Cyber Dragon*, the latest generation of dragon-mech.
This dragon is so flat, it could be called Pancake!
DO YOU WANT TO EAT A GRILLED SAUSAGE BUT YOU DON'T HAVE A GRILL? ASK YOUR FIRE-BREATHING DRAGON FOR HELP!

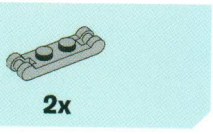

FUSION DRAGON

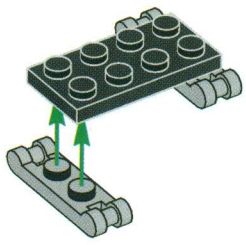

With the help of the Dragon Blade, Kai and Nya combined their elemental powers to create the mighty Fusion Dragon. Build one just like it by following the steps below.

BUILDING INSTRUCTIONS

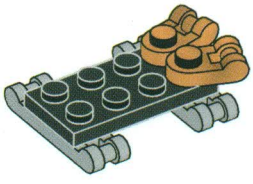

1 

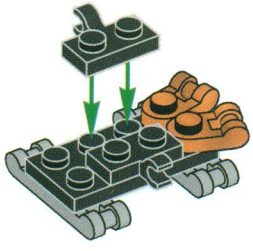

2 

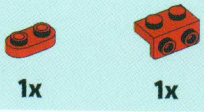

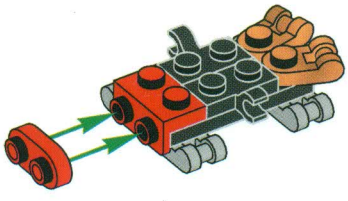

3 

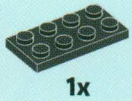

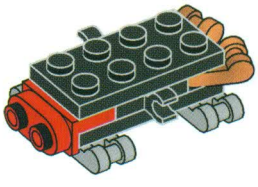

4 

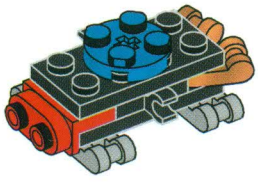

5 

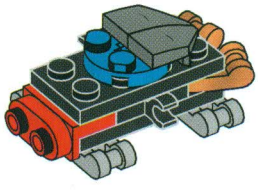

6 

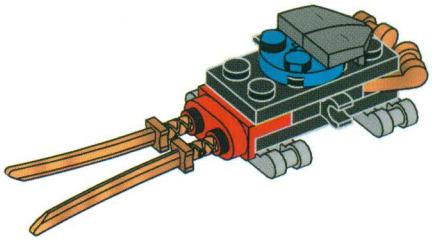

7 

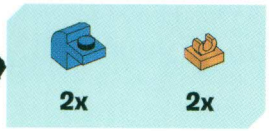

8 

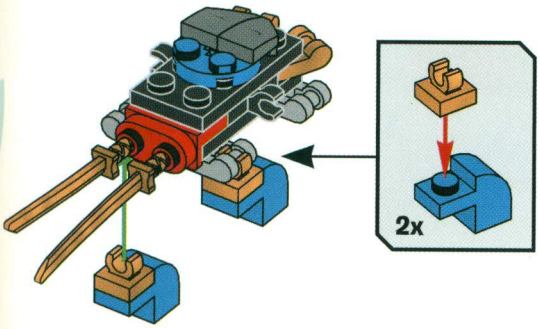

9 

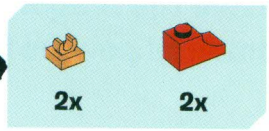

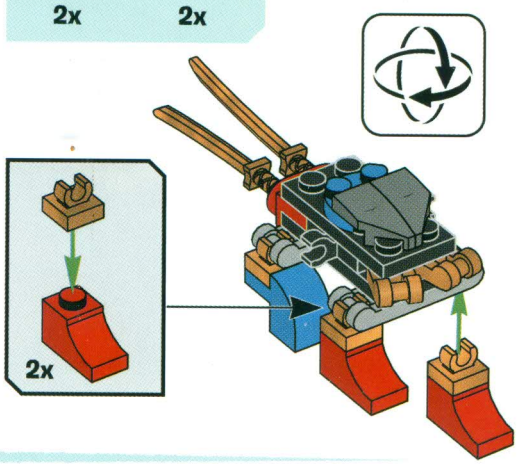

10

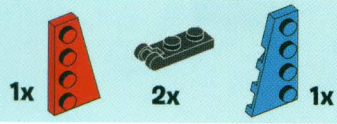

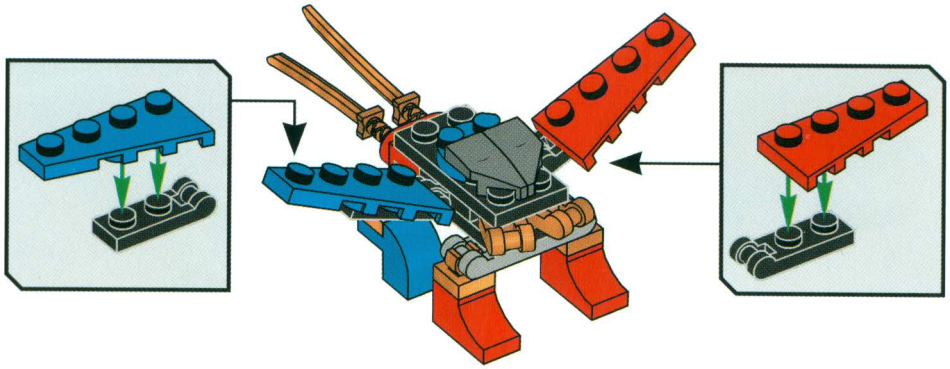

11

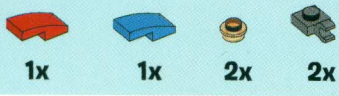

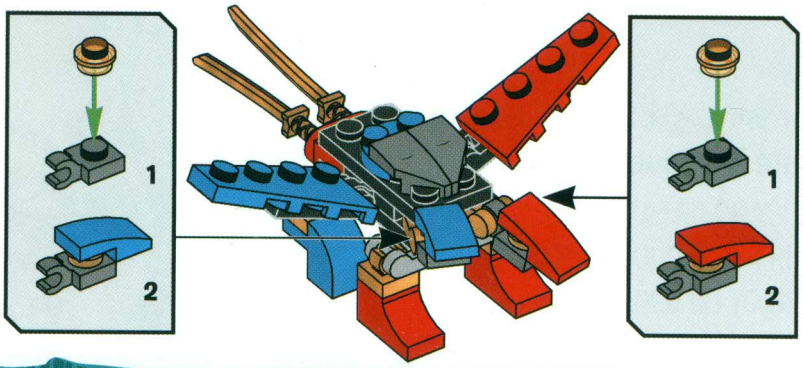

12

13

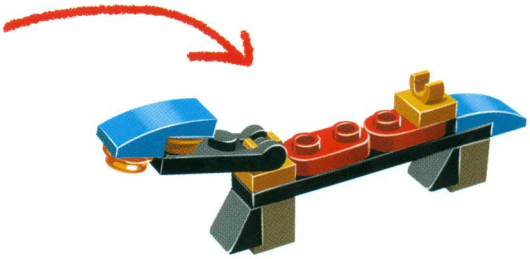

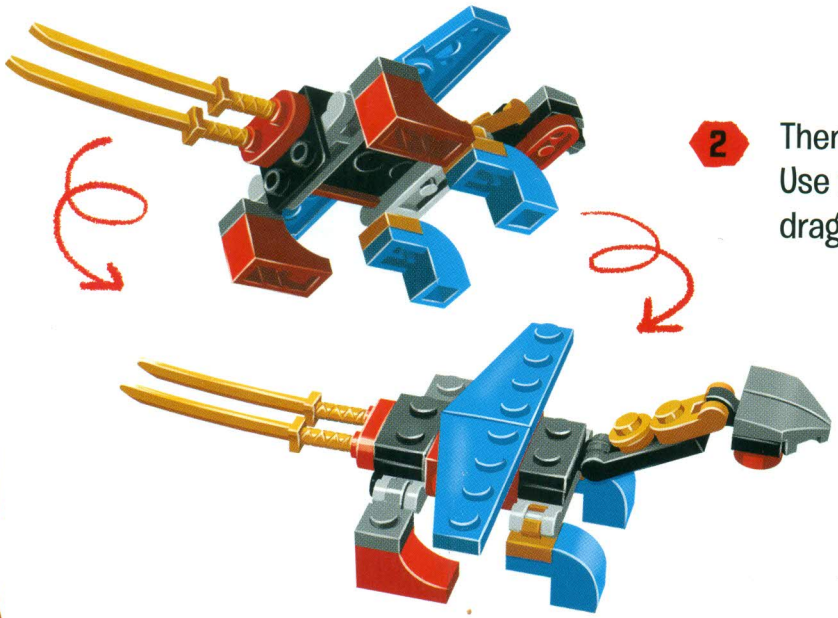

COMBO DRAGON

You might not have the Dragon Blade, but you do have your LEGO pieces. Combine elemental powers to create a combo dragon of your own.

HOW IT'S DONE

1. Use a few pieces to build a basic dragon.

2. Then, build a second dragon. Use more elements so this dragon is larger than the first.

3. Now take your first two dragons apart and combine all of the pieces you used to create a unique Fusion Dragon.

BRICK BOOST

THE FUSION DRAGON CAN COMBINE THE POWER OF MORE THAN TWO ELEMENTS. FOR EXAMPLE, YOU CAN BUILD FOUR SMALL DRAGONS AND THEN COMBINE THEM TO CREATE THE ULTIMATE COMBO DRAGON.

OUR ULTRA DRAGON (CALLED ULTRA BY FRIENDS) HAS HELPED US TO DEFEAT MORE THAN ONE VILLAIN.

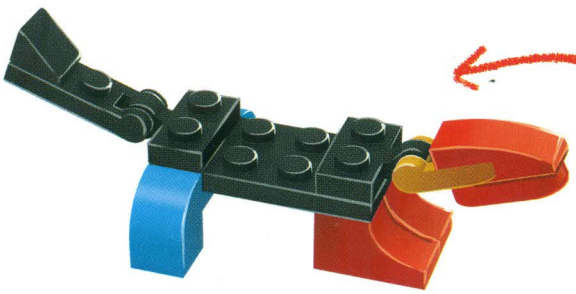

SMALL, BIGGER, BIGGEST

You don't have to go to the Spirit Coves to watch a dragon grow up. Use your elements to watch it happen now!

HOW IT'S DONE

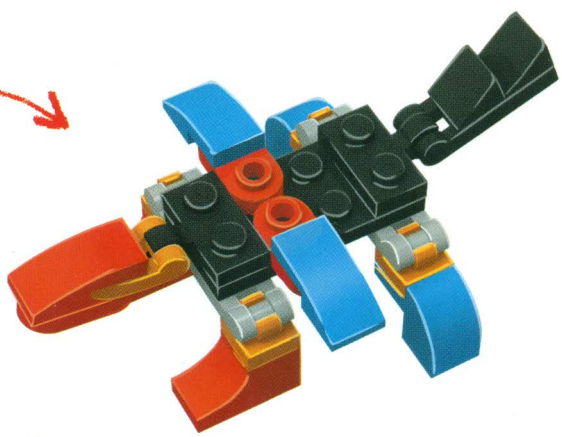

1. Lay out all the pieces included with this set.

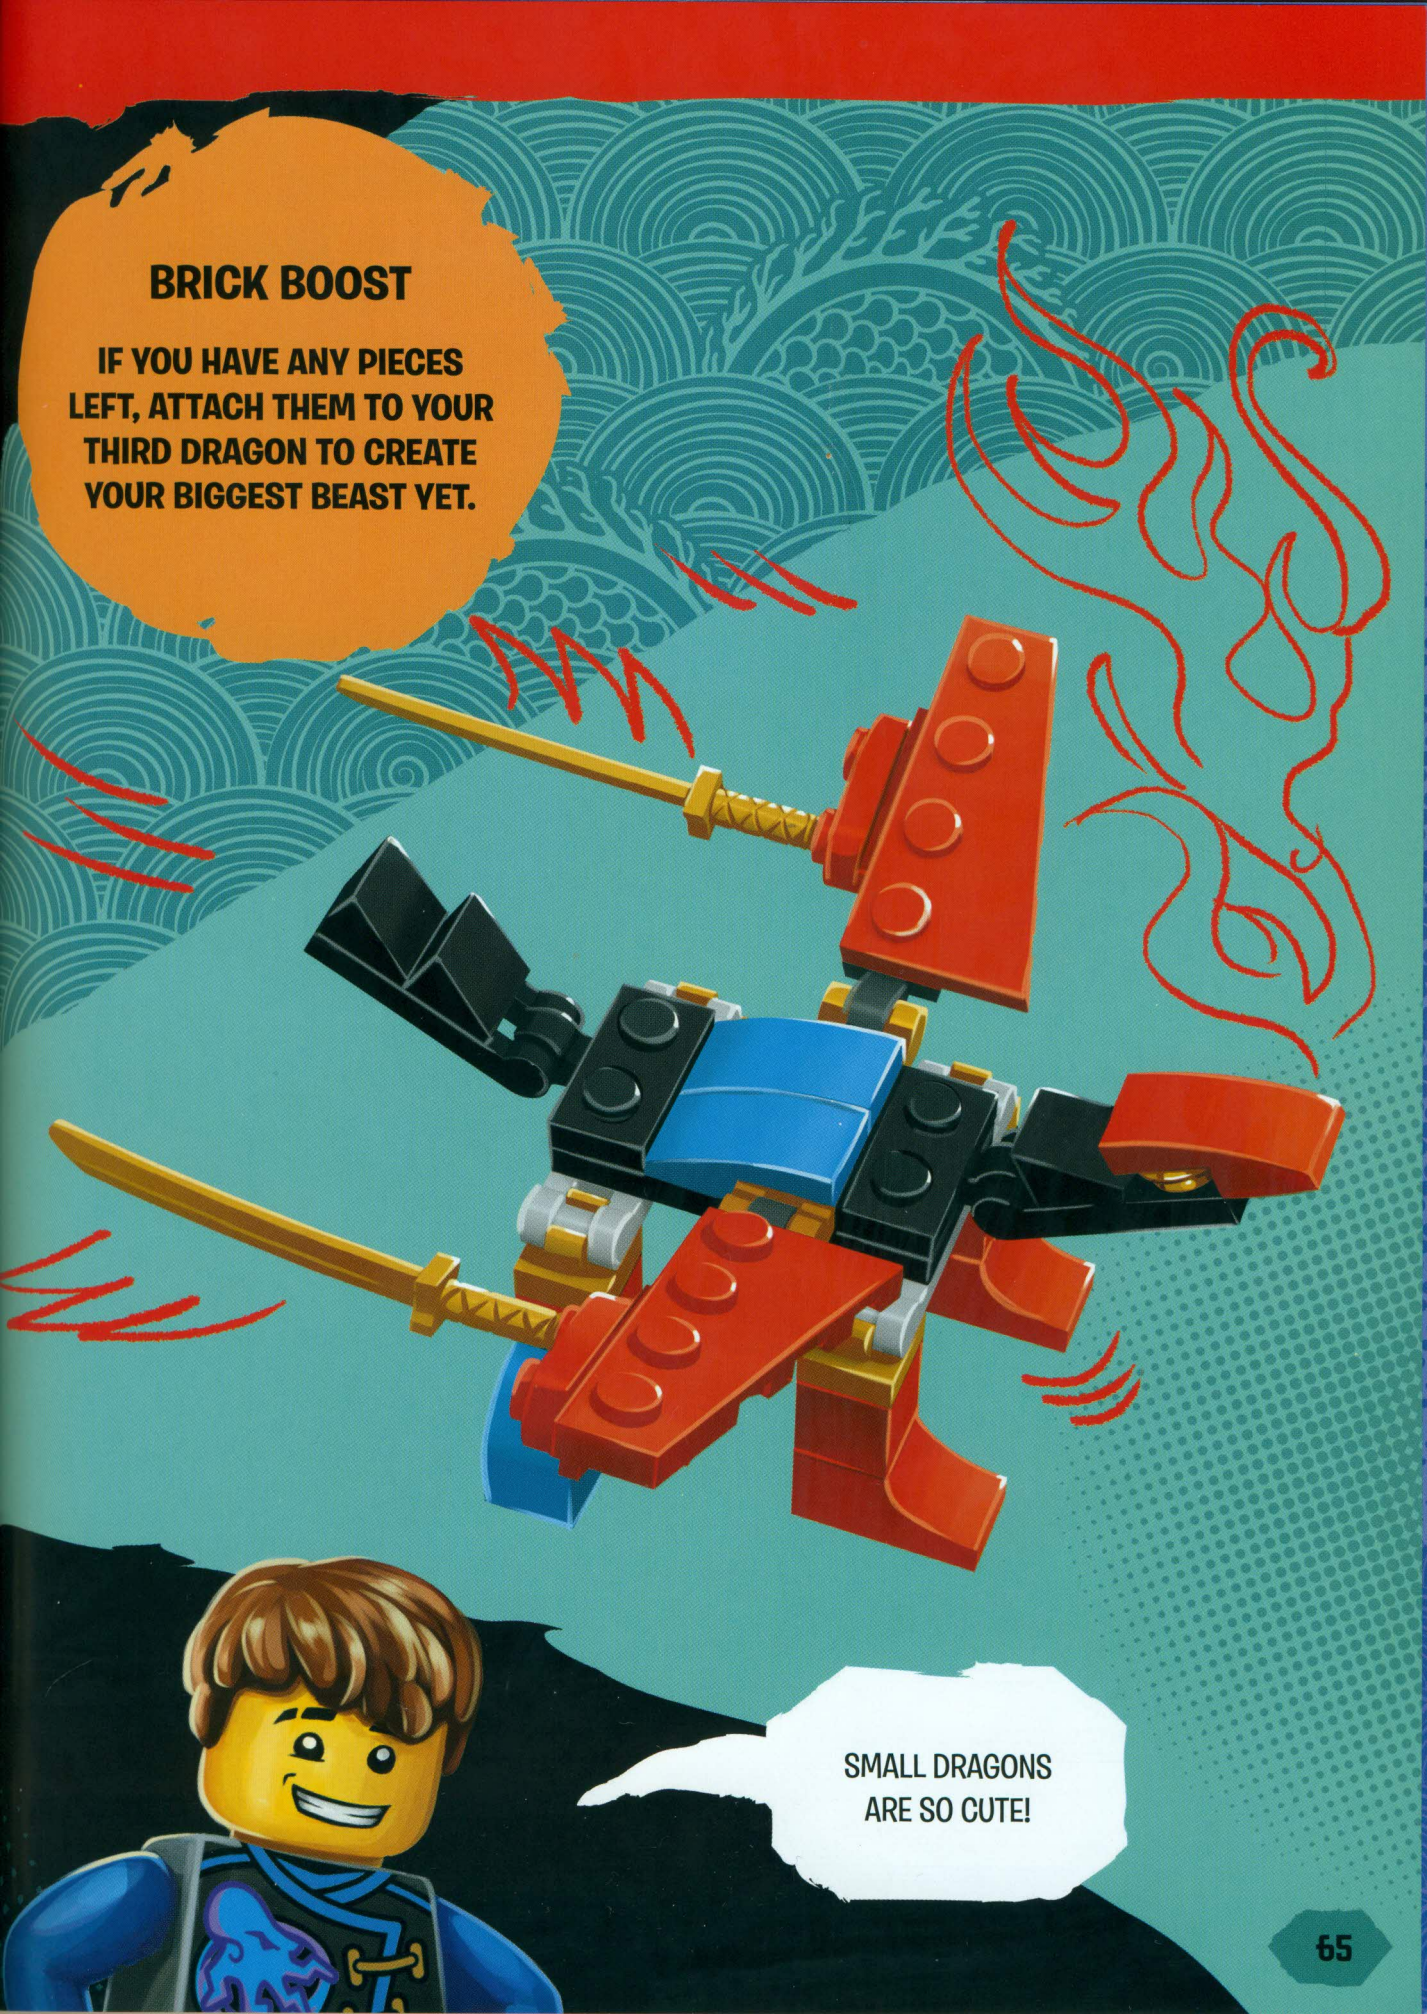

2. Build a small dragon with short legs and wings that have not yet grown.

3. Make your dragon bigger by adding small wings and longer legs.

4. Finally, create your biggest dragon by arming the wings with swords, placing armour on the dragon's back, and adding a long neck with scales.

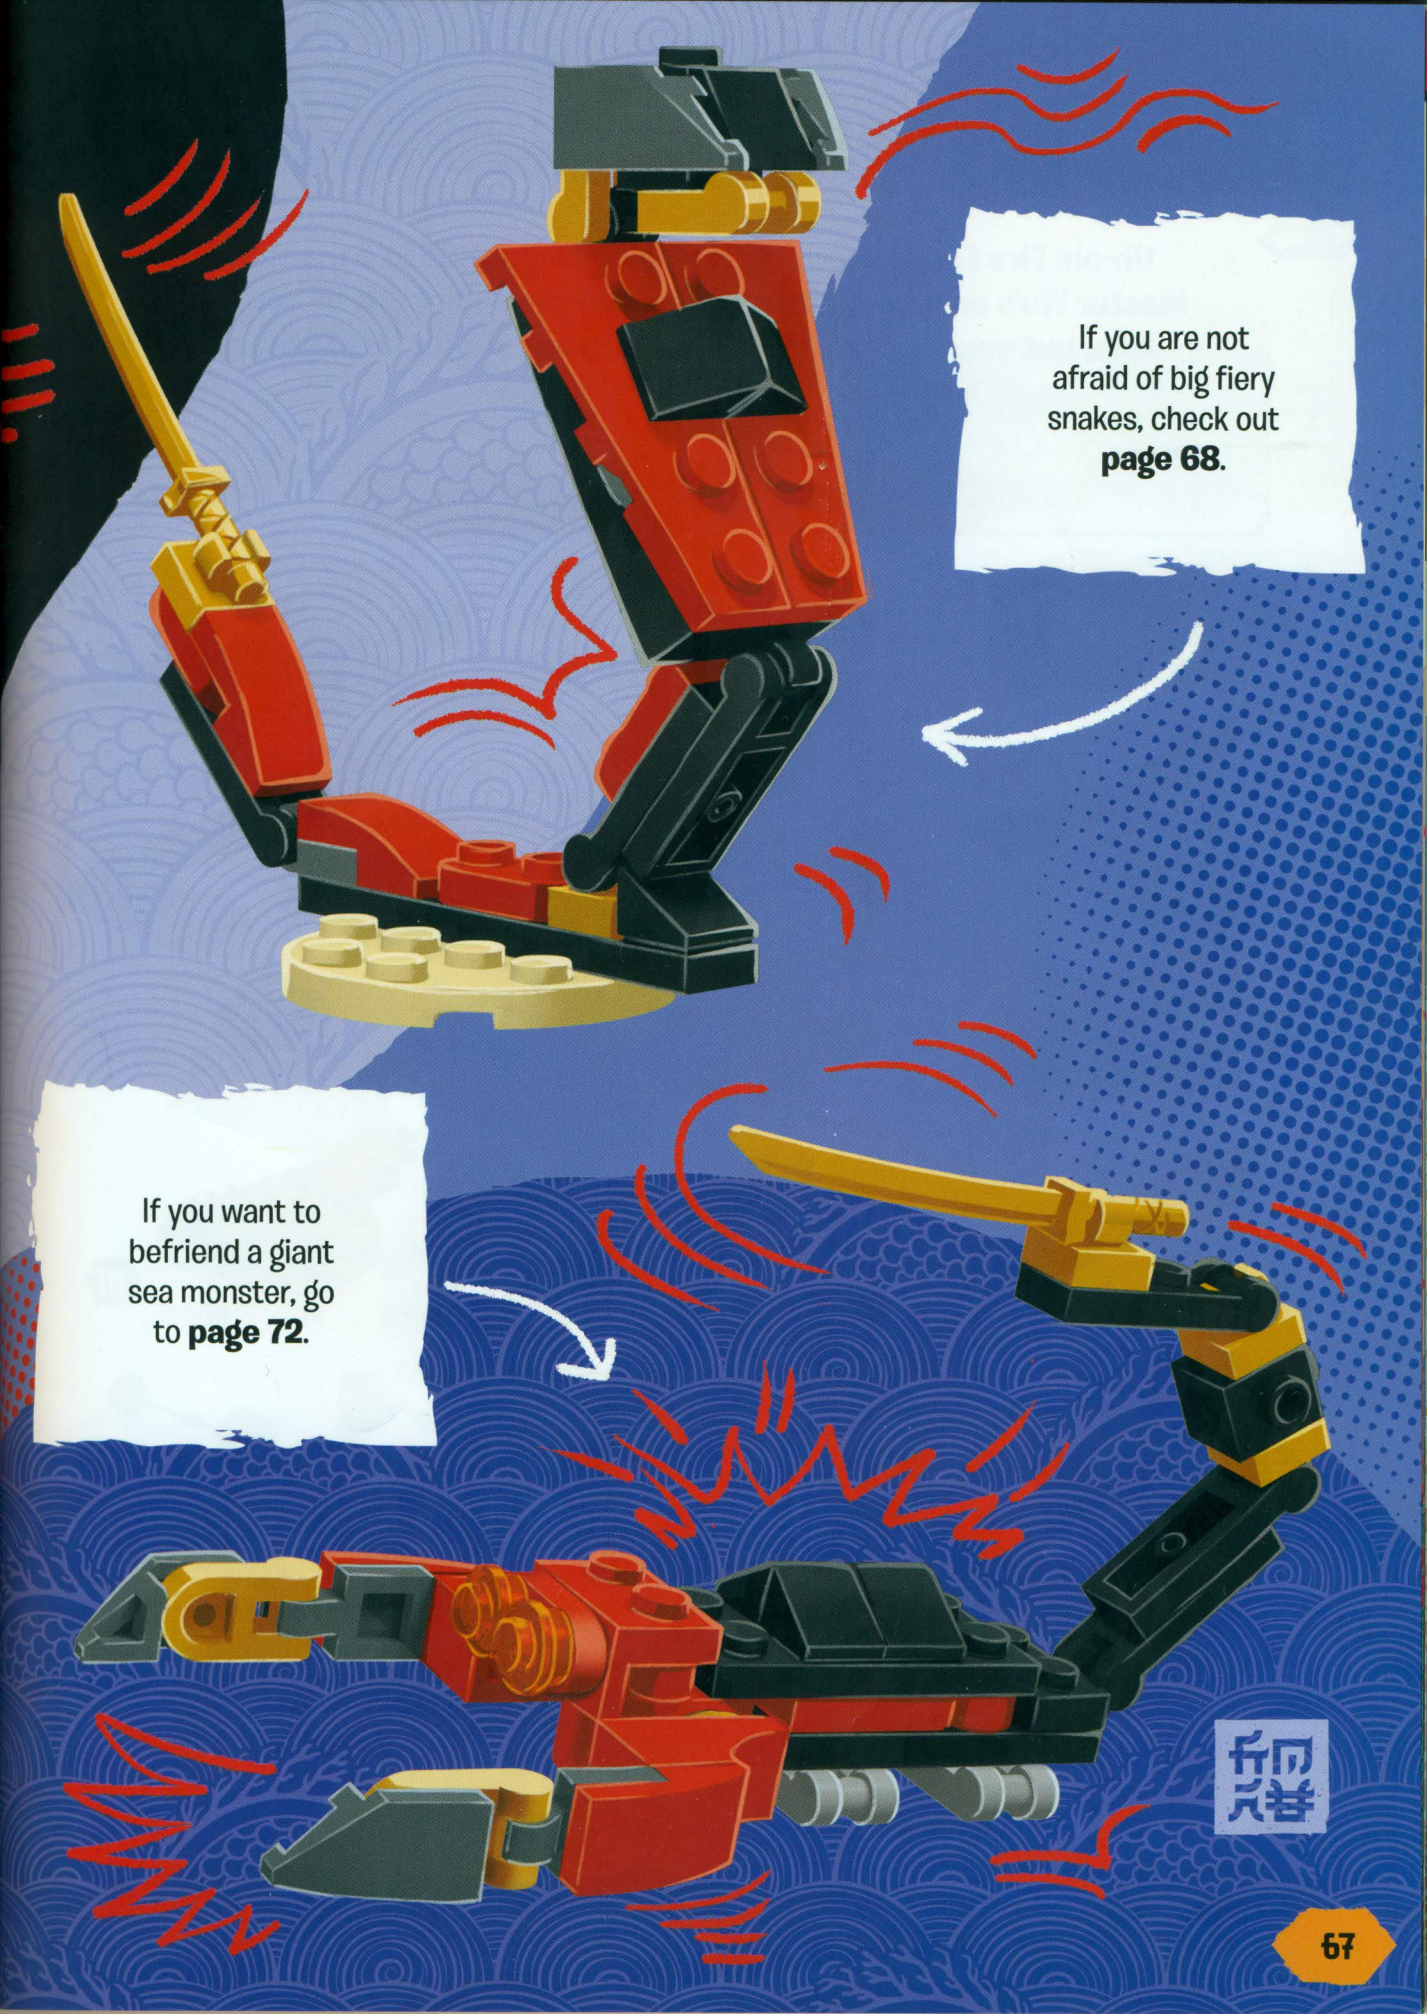

BRICK BOOST
IF YOU HAVE ANY PIECES LEFT, ATTACH THEM TO YOUR THIRD DRAGON TO CREATE YOUR BIGGEST BEAST YET.
SMALL DRAGONS ARE SO CUTE!

CHAPTER 4

FRIENDS AND FOES

The ninja have many enemies, but they also have a lot of friends, so good always wins!

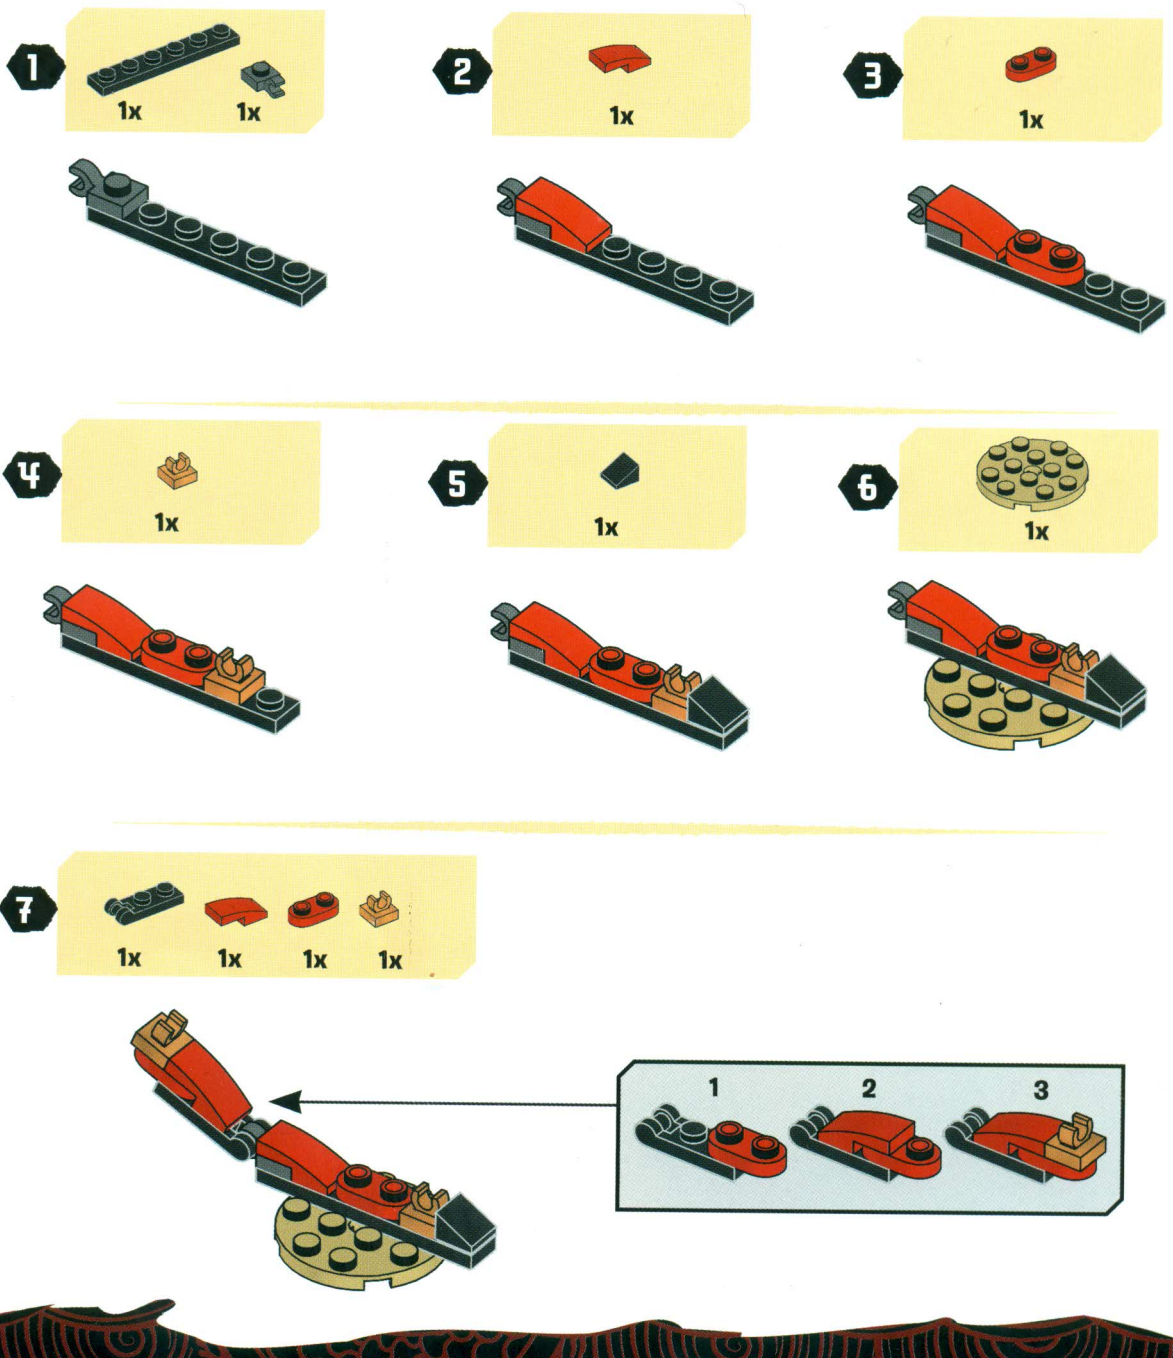

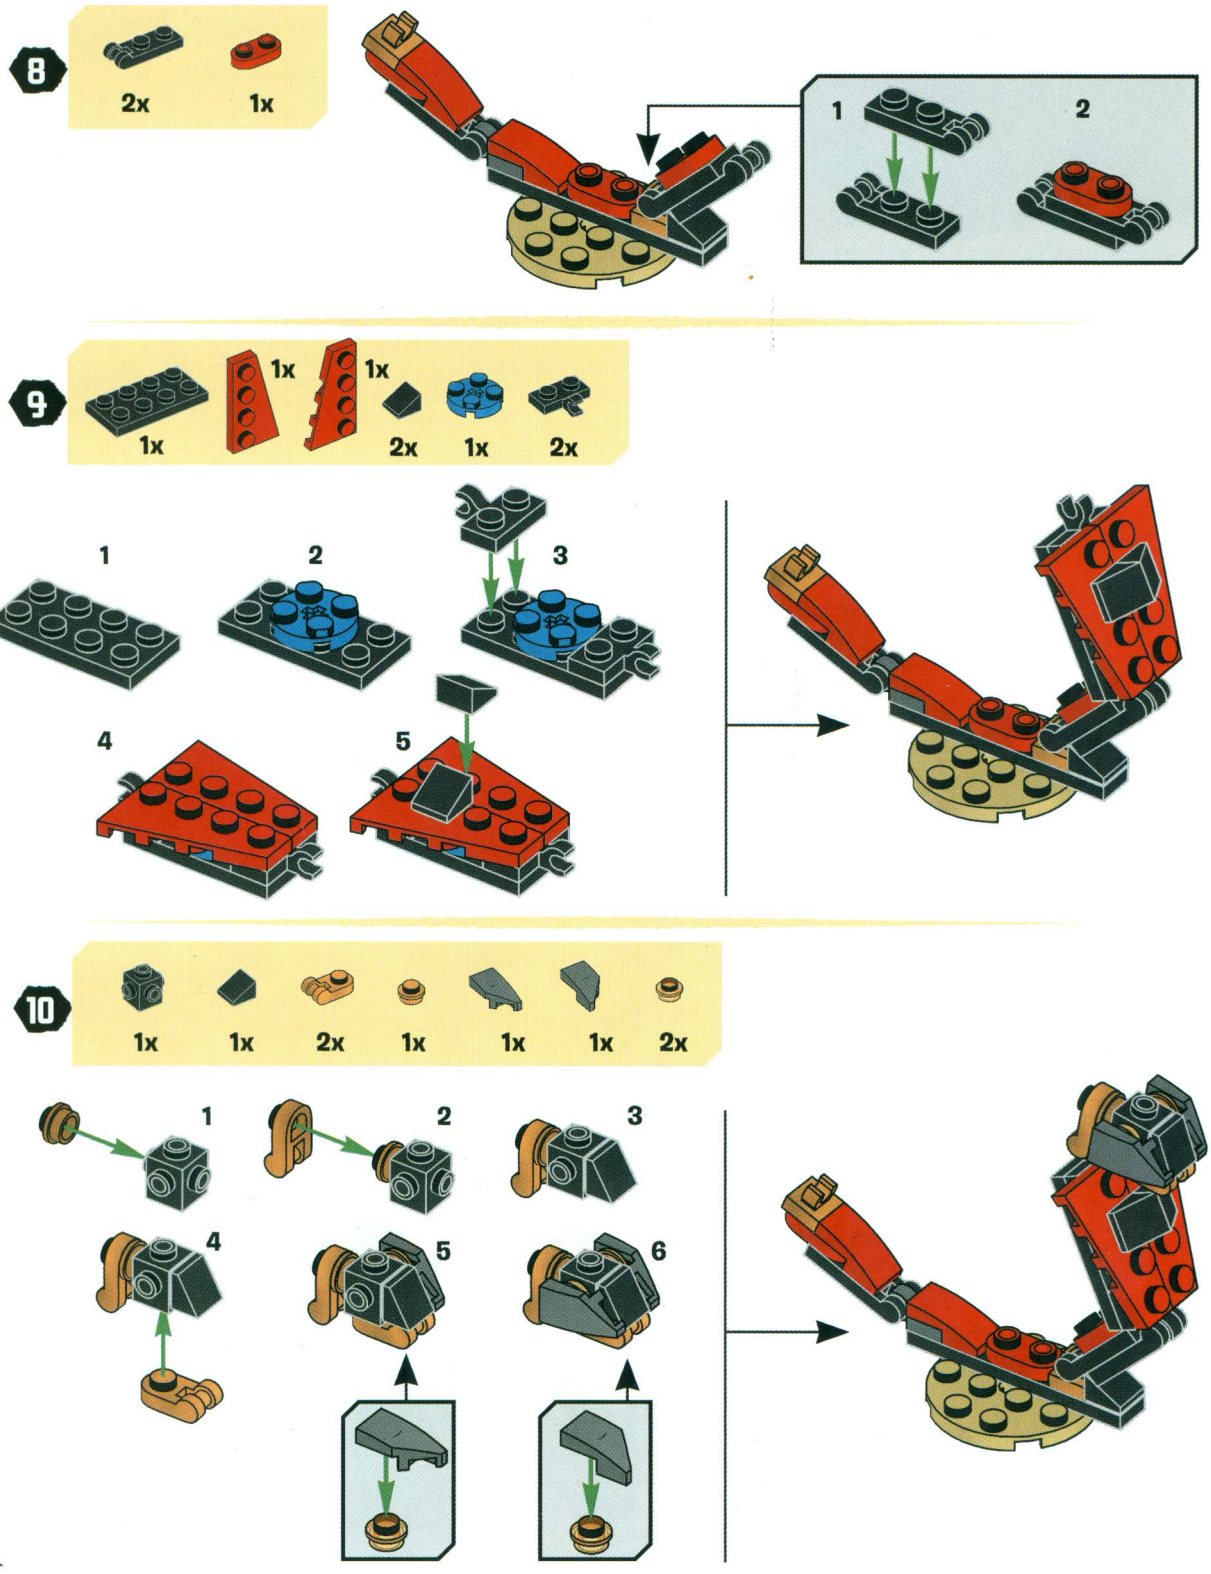

If you are not afraid of big fiery snakes, check out **page 68**.
If you want to befriend a giant sea monster, go to **page 72**.

FIRE FANG

Uh-oh! Fire Fang is coming! It's going to get HOT in a moment! Master Wu's enemy, Aspheera, created the snake out of volcanic lava, but you can build it with your much cooler LEGO pieces.

THE GREAT DEVOURER

The Great Devourer was a tiny snake until it ate everything in its path and became the largest snake in the world of Ninjago.

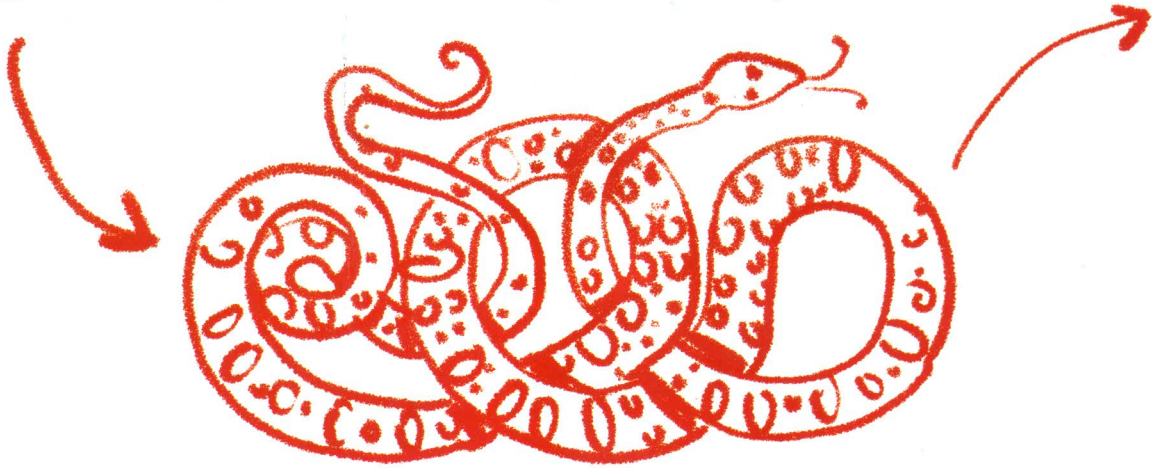

HOW IT'S DONE

1. Follow the instructions on **pages 68-69** to build Fire Fang.

2. Start feeding the beast and enlarge it by adding more pieces to its tail.

3. Keep adding pieces to build the longest snake that you can!

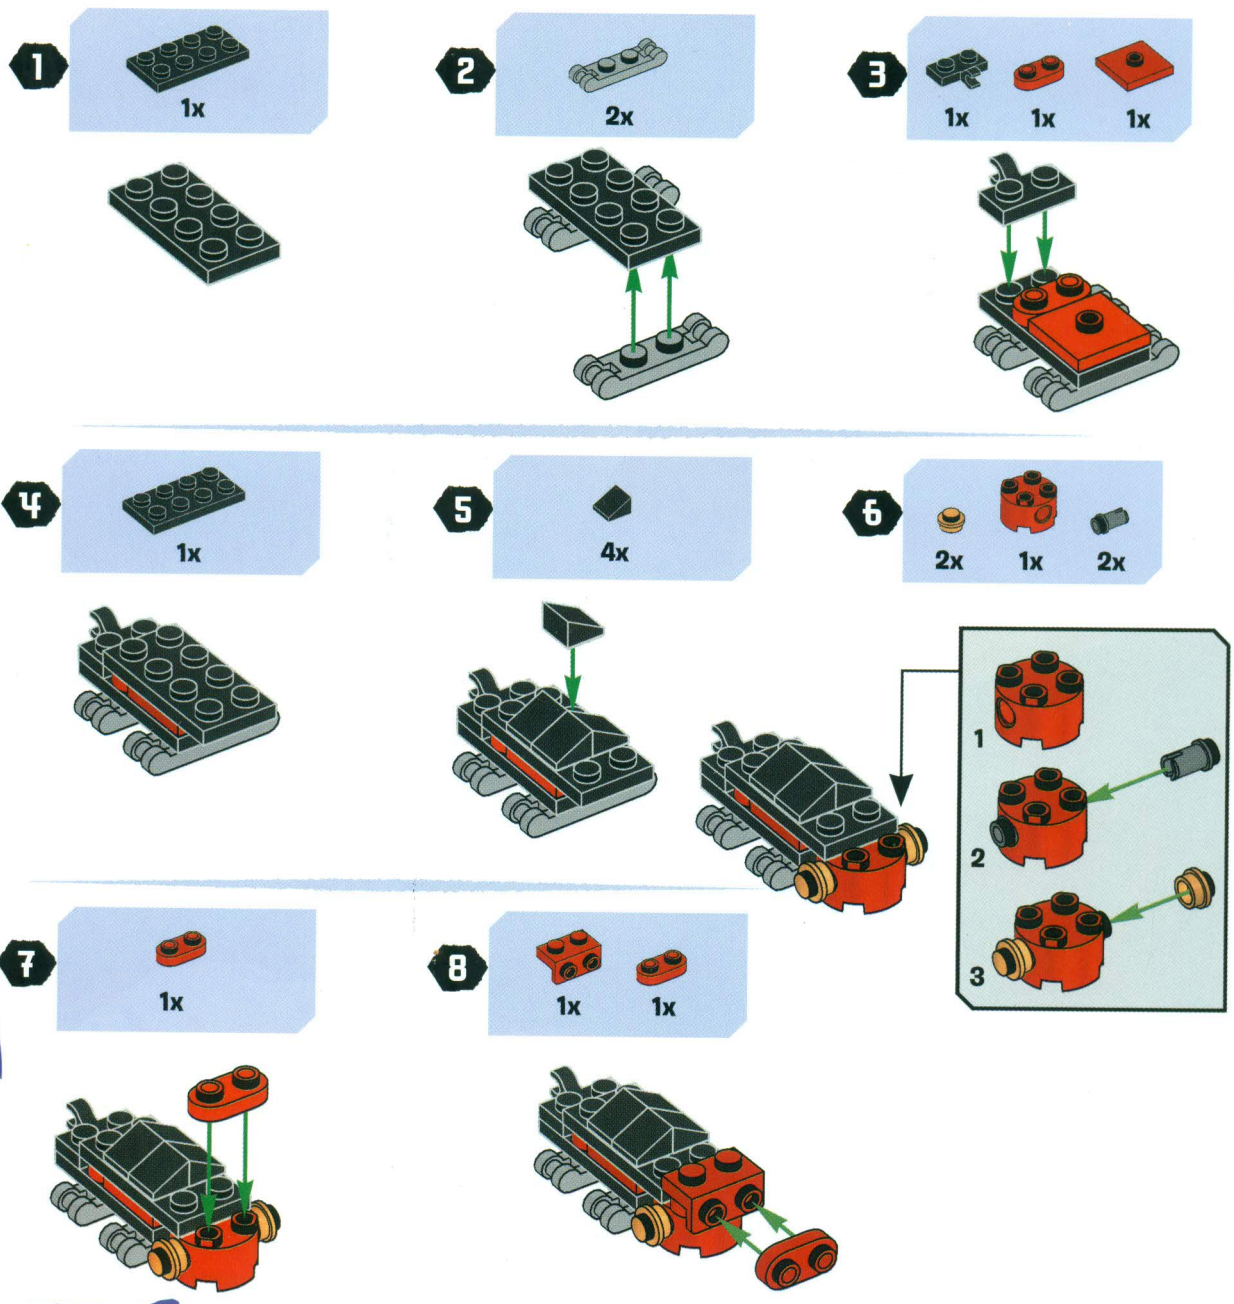

BRICK BOOST
THE GREAT DEVOURER IS ALWAYS HUNGRY! IF YOU HAVE REMAINING PIECES, TRY REBUILDING YOUR SNAKE TO SEE IF YOU CAN MAKE IT EVEN BIGGER.
I USED TO BE GOOD, BUT THEN I WAS BITTEN BY THIS VILE CREATURE AND TURNED BAD TO THE BONE!

CRABBY

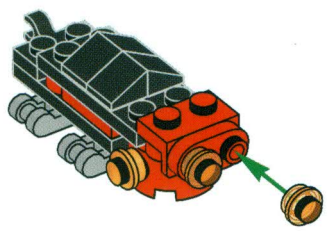

The ninja have met many mutant creatures on their journey. One of them is Crabby: a half-crab, half-lobster with a friendly nature.

BUILDING INSTRUCTIONS

CRABBY

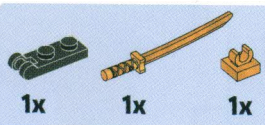

BUILDING INSTRUCTIONS (CONTINUED)

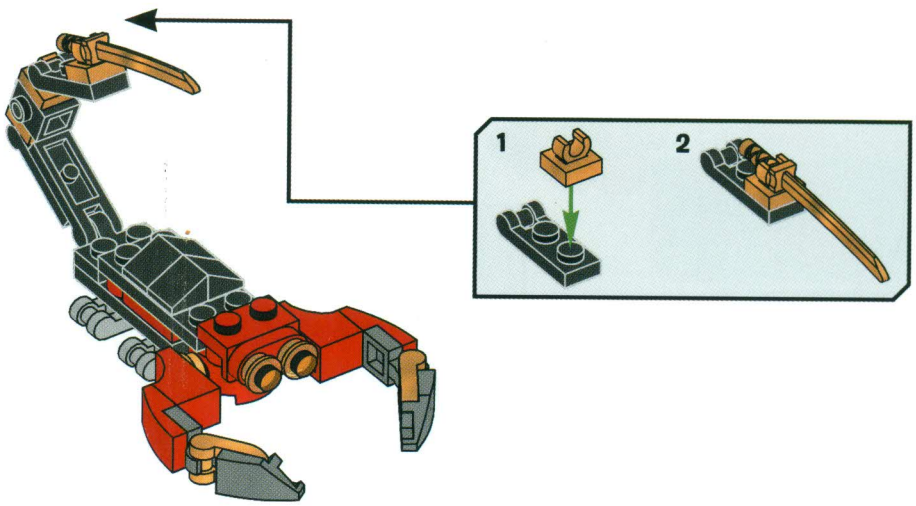

14

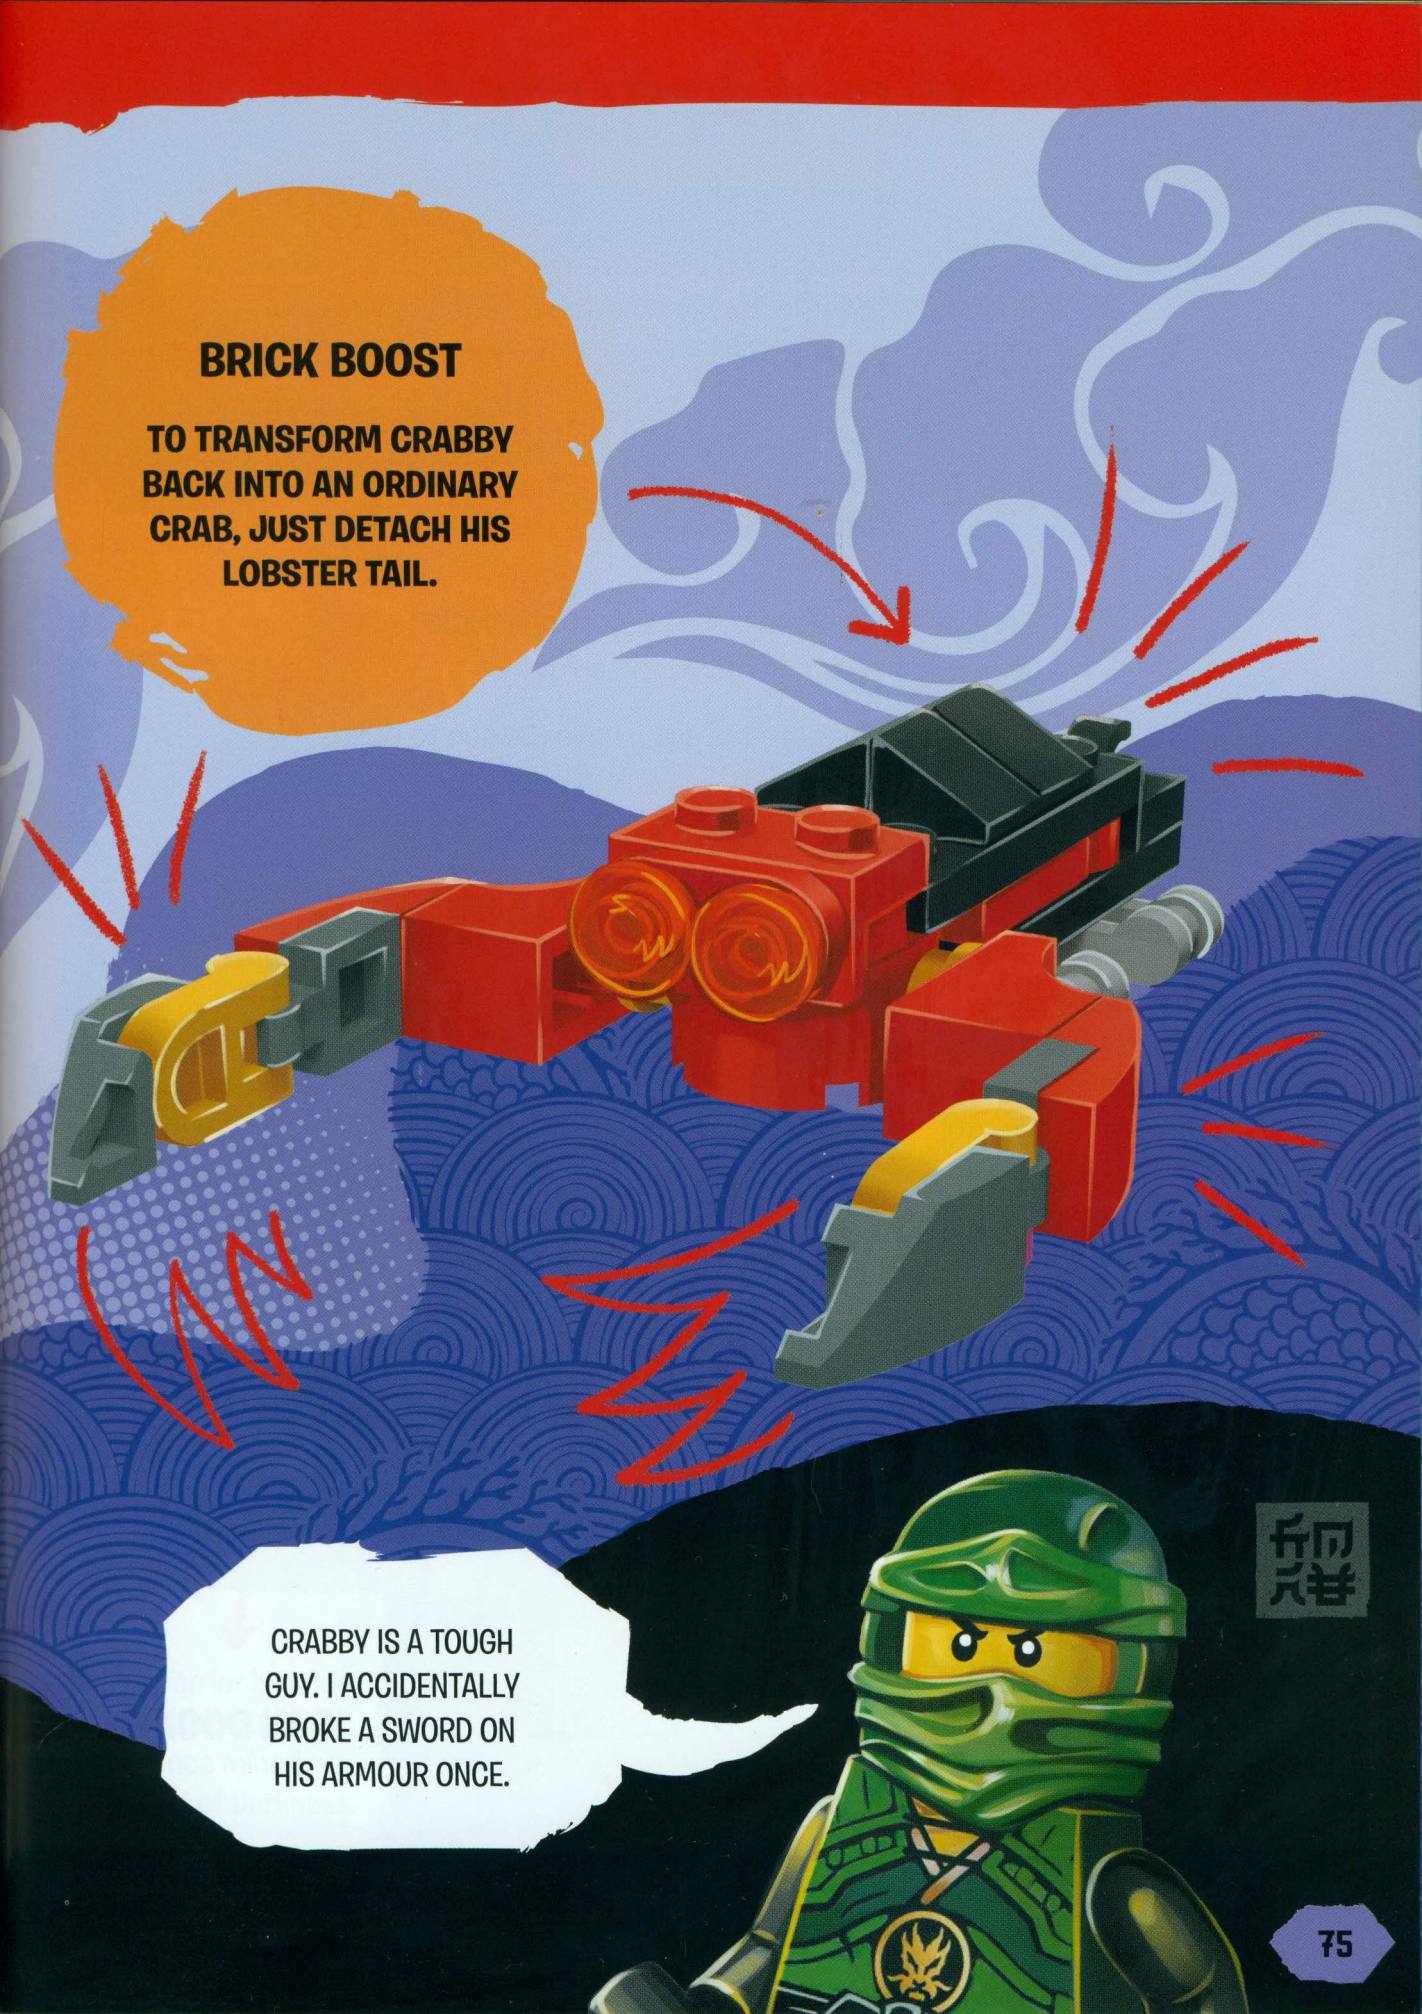

15

BRICK BOOST
TO TRANSFORM CRABBY BACK INTO AN ORDINARY CRAB, JUST DETACH HIS LOBSTER TAIL.
CRABBY IS A TOUGH GUY. I ACCIDENTALLY BROKE A SWORD ON HIS ARMOUR ONCE.

XXL OPPONENTS

The villains love to make a big impression. This is why they create huge creatures that can destroy everything in their path.

HOW IT'S DONE

1. Look at the options below. Select one option each time and then follow the arrow.
2. See which giant creature you have chosen to build.
3. Use your imagination to build your giant creature!

A REALLY EVIL VILLAIN

GARMADON

KRUX AND ACRONIX

INDESTRUCTIBLE STONE → **STONE WARRIOR**

MASSIVE ROCK → **COLOSSUS**

METAL → **IRON DOOM**

Colossus is a stone giant created by Garmadon.
Iron Doom is a destroyer mech that can travel through time.
Stone Warrior is made of an indestructible substance mined on the Island of Darkness.

CHAPTER 5

EXTRAORDINARY PLACES

There are plenty of unique places in the world of Ninjago where you can meet Master Wu's team. Get ready to visit some of them!

BUILD AS MANY MINIATURE NINJAGO LOCATIONS AS POSSIBLE. YOU ONLY HAVE FIVE MINUTES!

SOMETIMES YOU CAN FIND US IN KRYPTARIUM PRISON, BUT I DO NOT RECOMMEND VISITING THIS PLACE.

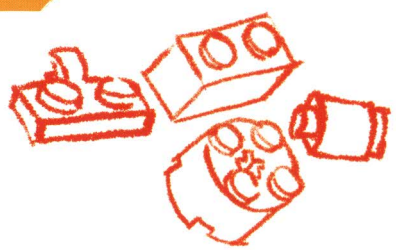

Would you like to visit an ancient temple? See **page 90**.
Do you want to display a ninja weapon in a unique way? Go to **page 84**.

TRAINING CENTRE

Located on one of the peaks of the Mountains of Impossible Height, the Monastery of Spinjitzu is not only a home for the ninja, but also a place where they learn and practise their ninja skills.

HOW IT'S DONE

1. Lay out all of the pieces included with this set.

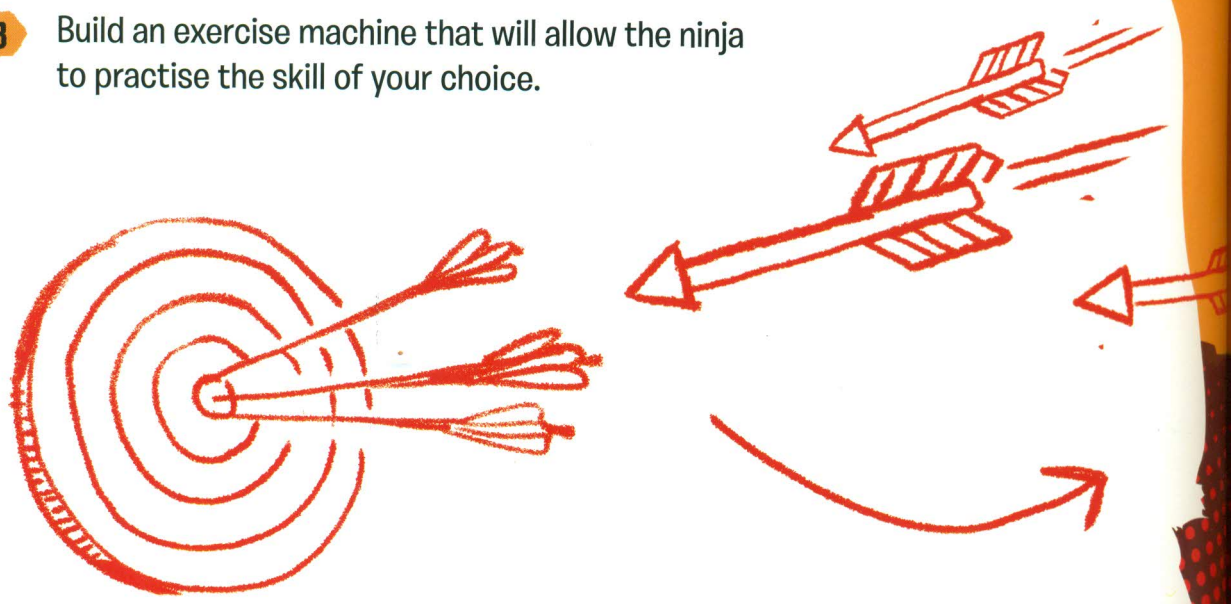

2. Choose what you want to focus on during your ninja training:

STRENGTH • SPEED • VISION

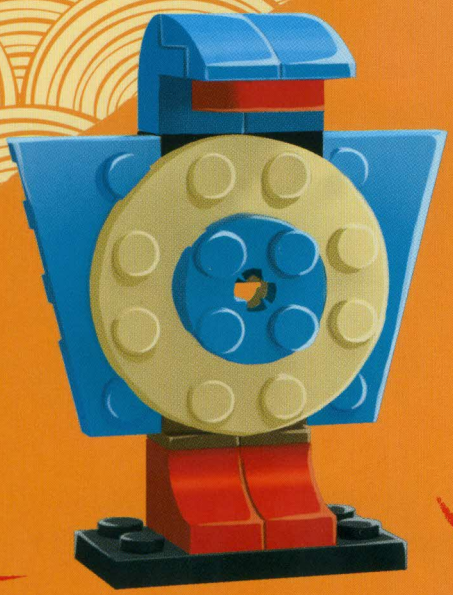

3. Build an exercise machine that will allow the ninja to practise the skill of your choice.

BRICK BOOST

TRY BUILDING A TRAINING DEVICE THAT WILL ALLOW YOU TO PRACTISE ALL THREE SKILLS AT THE SAME TIME.

A punching bag allows you to practise strong blows and quick dodges.

Perfect your aim by shooting at a serpentine-like target.

DUELLING DUMMIES

The ninja use training dummies just like these ones to practice their fighting skills.

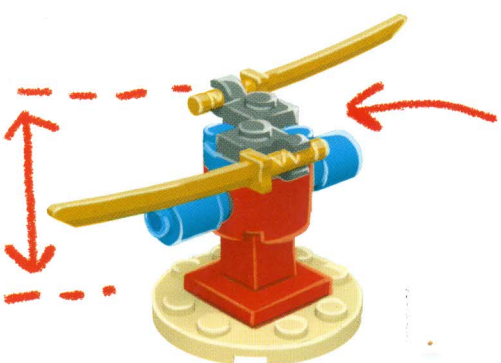

HOW IT'S DONE

1. Gather together all your pieces.
2. Read the guidelines below to learn what features to include in a training dummy.
3. Build a new dummy with all the important necessary features.

A TRAINING DUMMY:

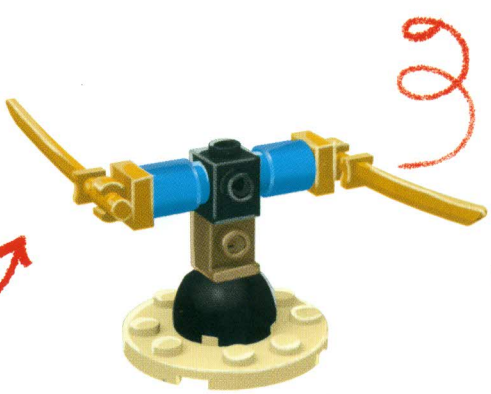

should be stable, so a ninja does not knock it over with the first blow;

should be at the ninja's head-height, so that they don't have to jump up during the duel;

should have moving arms, so the practise feels like a real fight.

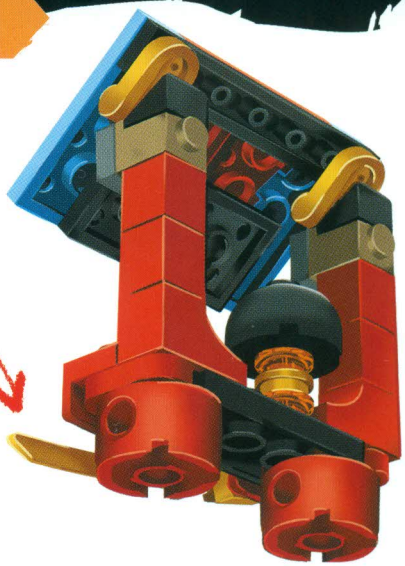

BRICK BOOST
TRY TO BUILD A DUMMY THAT RESEMBLES A REAL ENEMY. THEN THE TRAINING WILL BE EVEN MORE EFFECTIVE!
THERE'S NOTHING LIKE A WORK-OUT IN THE MORNING.

EVERYTHING IN ITS PLACE

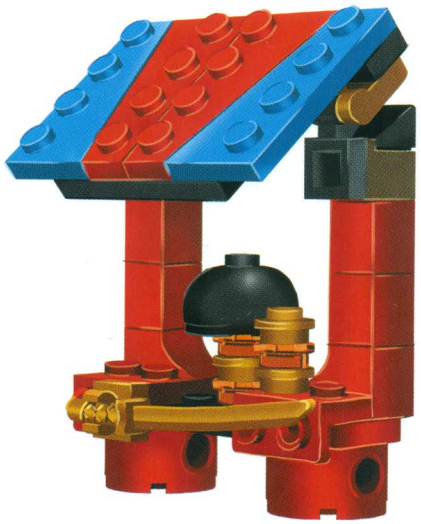

Some places in the Monastery of Spinjitzu are designed for storing weapons. If the weapons are always stored where they are supposed to be, then the ninja won't have to search for them in an emergency.

HOW IT'S DONE

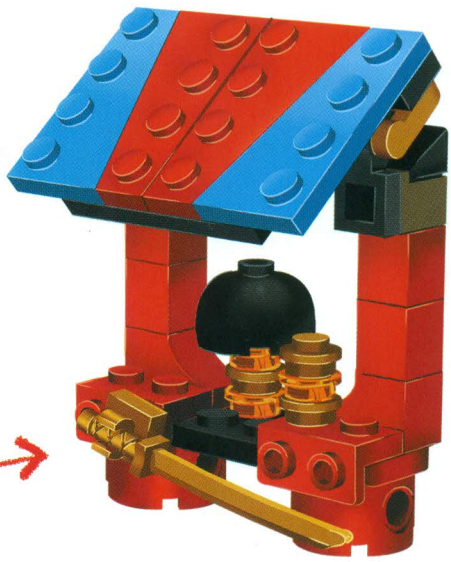

1. Choose two *bricks with holes* from your set. These will create a foundation to make your model stable.

2. Build a platform and connect it to the *bricks with holes*.

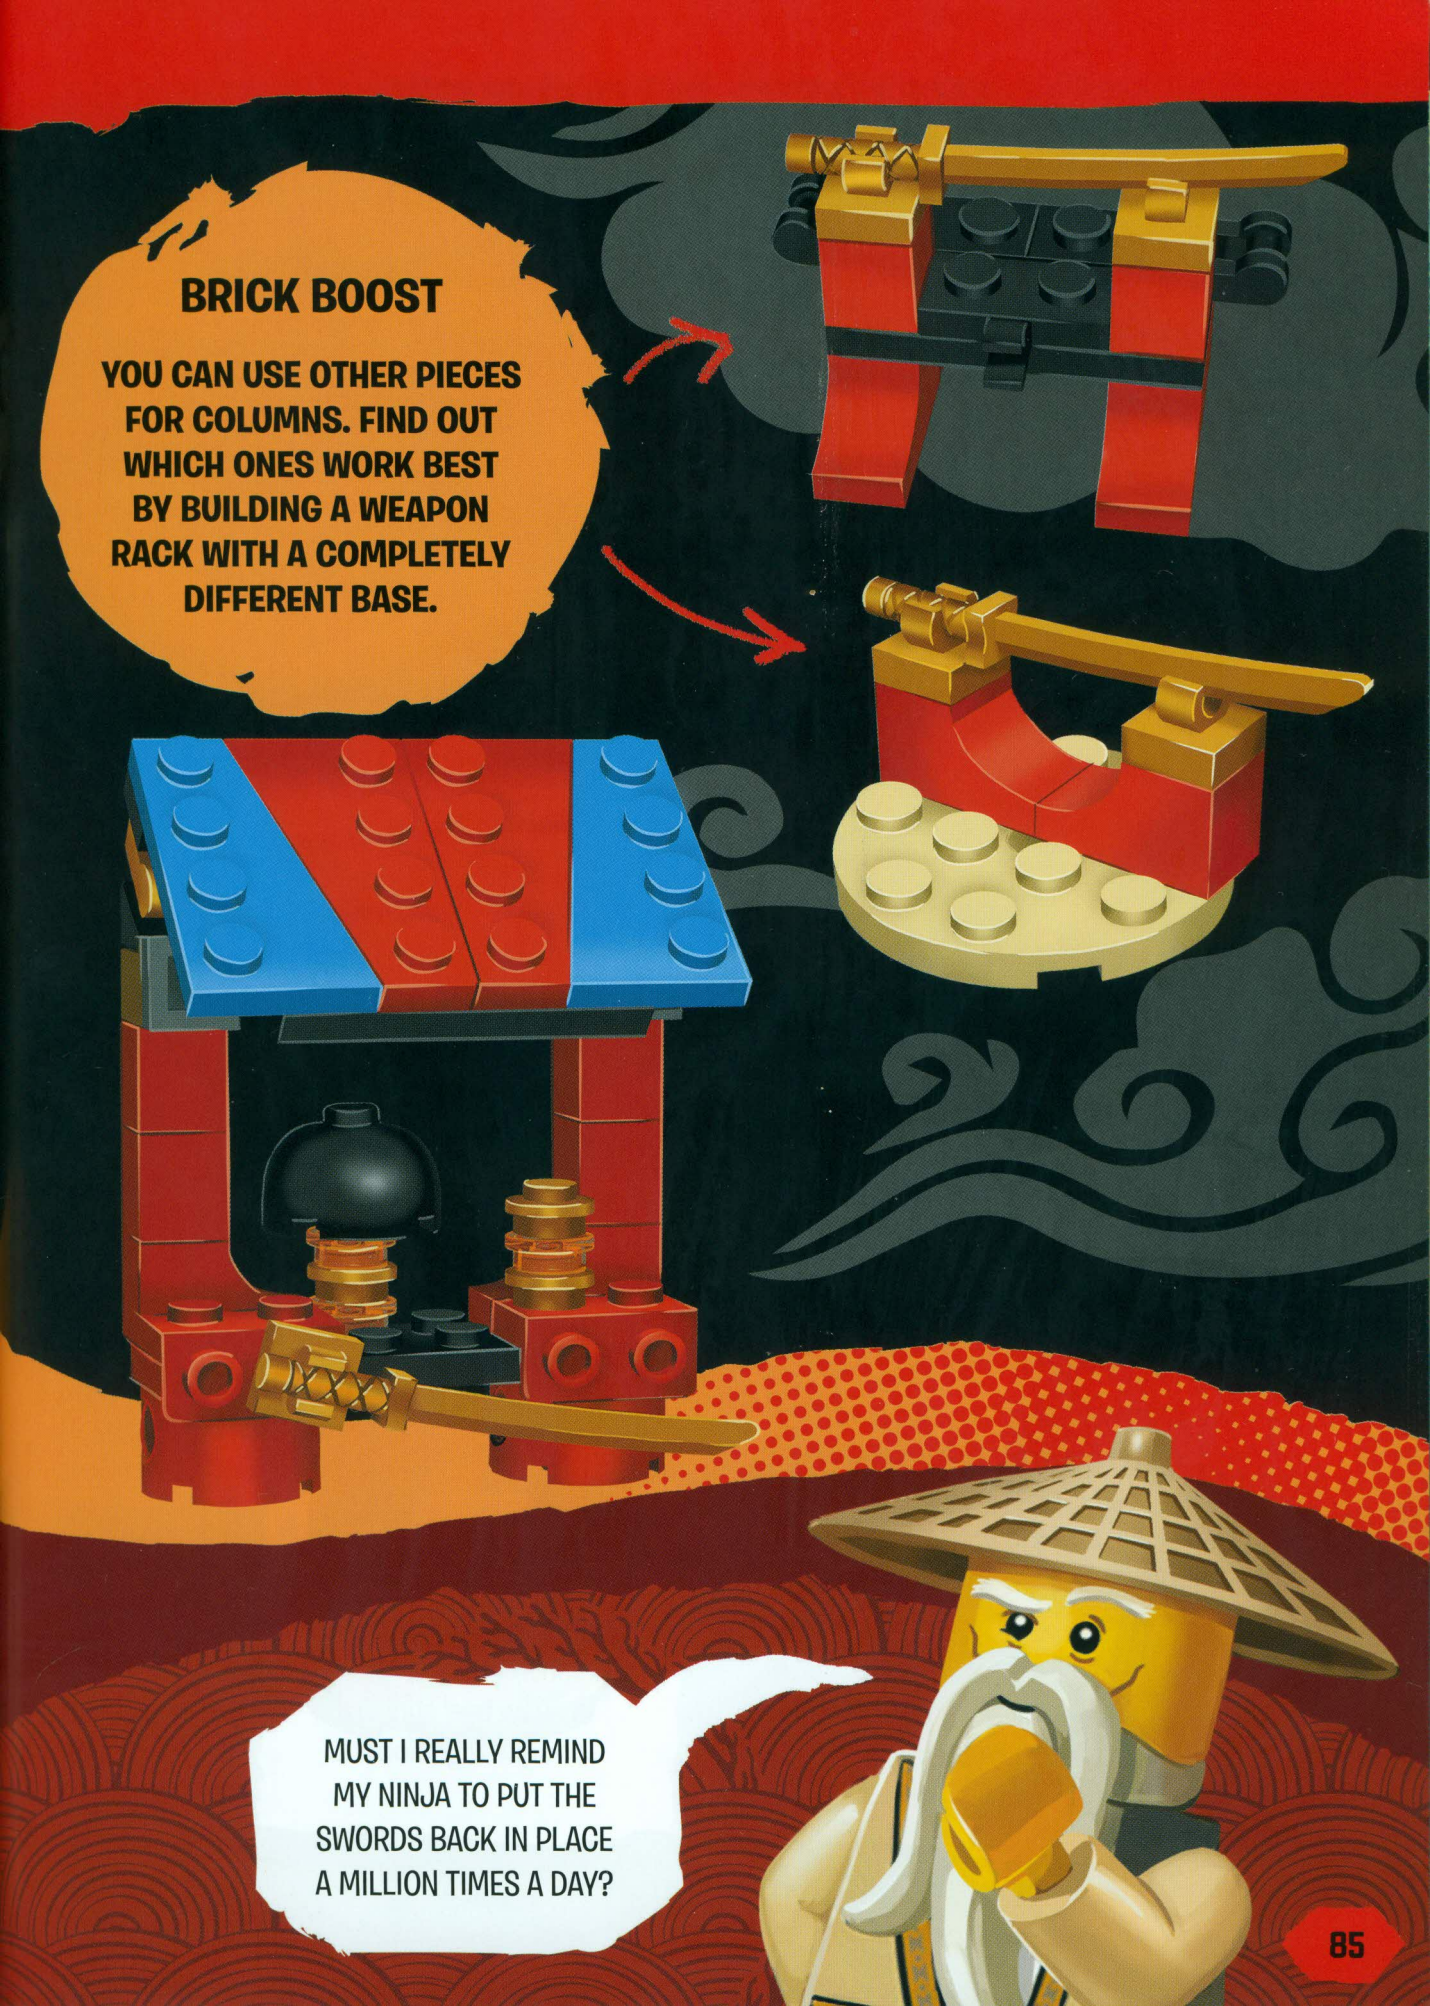

3. Build two identical columns on the platform. Decorate them with a few pieces.

4. Use *angular plates* to build a flat roof and put it on top of the columns.

5. Finally, place a sword and other accessories on the platform.

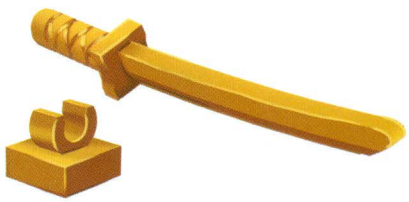

BRICK BOOST
YOU CAN USE OTHER PIECES FOR COLUMNS. FIND OUT WHICH ONES WORK BEST BY BUILDING A WEAPON RACK WITH A COMPLETELY DIFFERENT BASE.
MUST I REALLY REMIND MY NINJA TO PUT THE SWORDS BACK IN PLACE A MILLION TIMES A DAY?

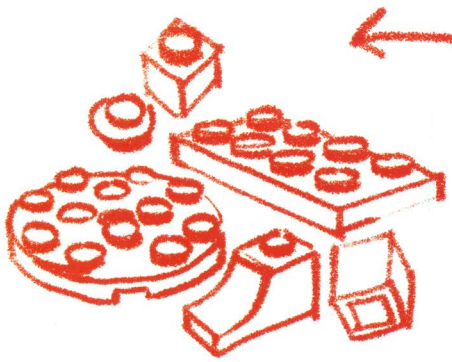

SWORD STORAGE

There's more than one way to store a sword! Try building the storage models shown below or create a few of your own.

HOW IT'S DONE

1. Select a *1x1 clip* and attach it to a sword.

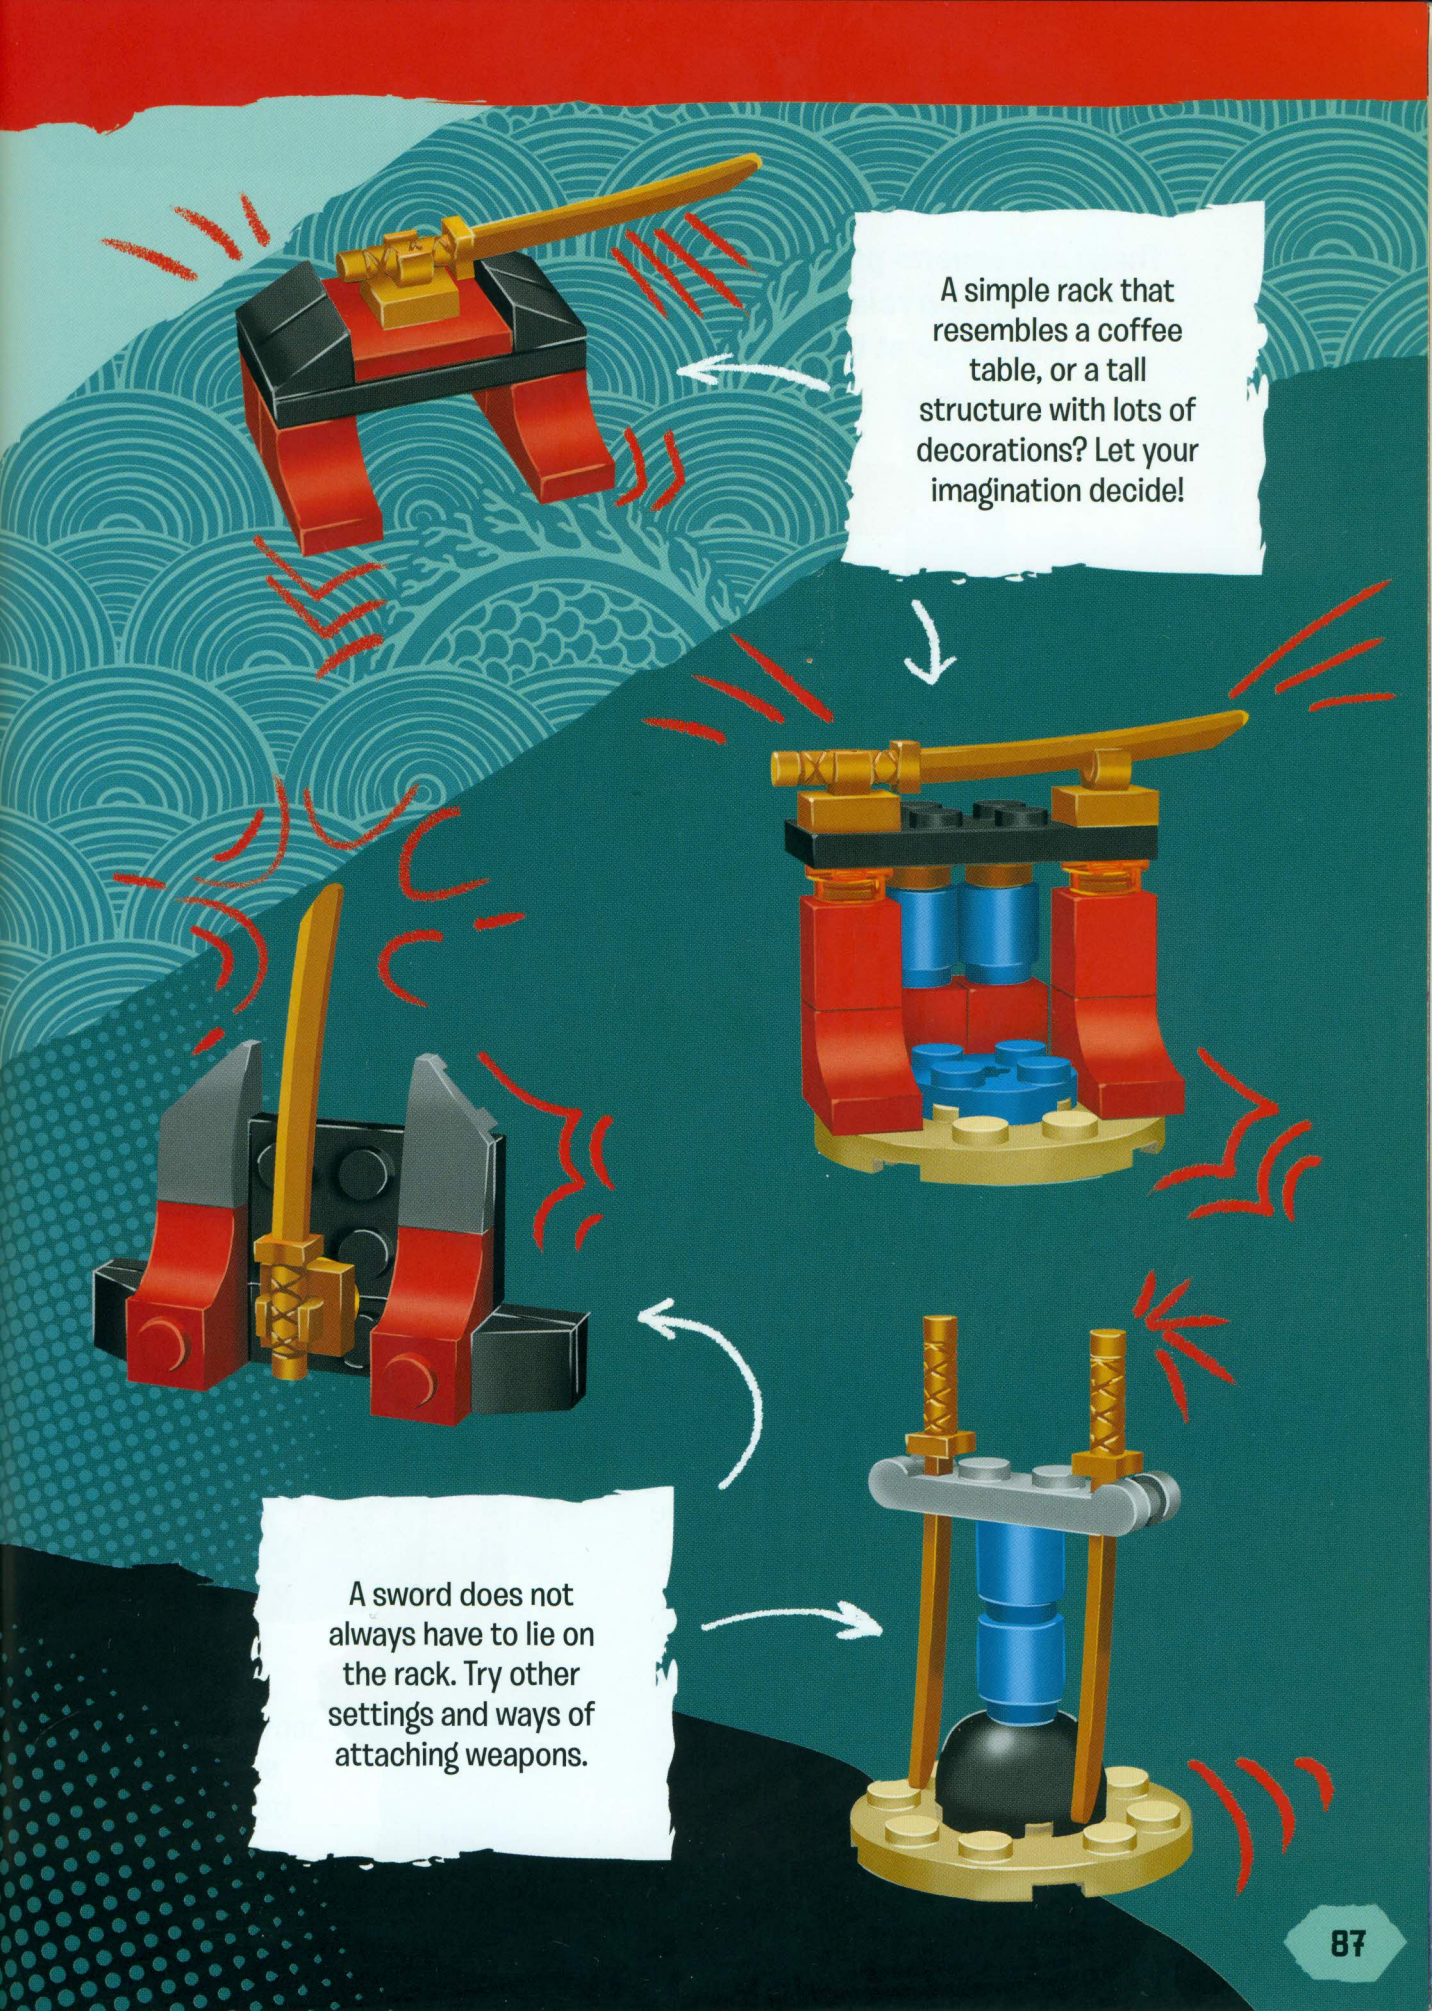

2. Then, lay out the remaining pieces in front of you and grab as many of them as you can.

3. Use the elements in your hands to build a cool sword rack and attach it to the *1x1 clip* with the sword.

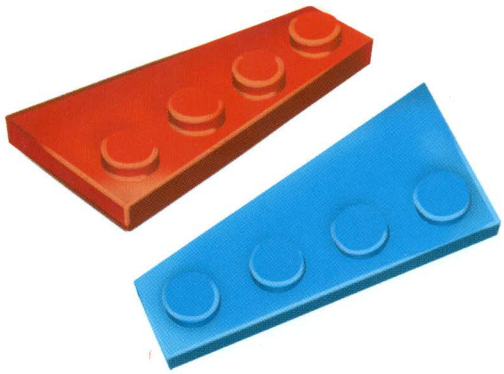

A simple rack that resembles a coffee table, or a tall structure with lots of decorations? Let your imagination decide!
A sword does not always have to lie on the rack. Try other settings and ways of attaching weapons.

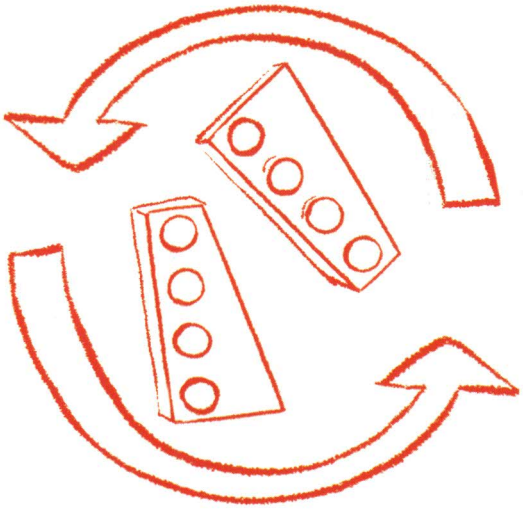

RELAXATION ZONE

There are several places in the Monastery of Spinjitzu where the ninja can relax after training and grueling missions. Have a go at building some of these cosy places.

HOW IT'S DONE

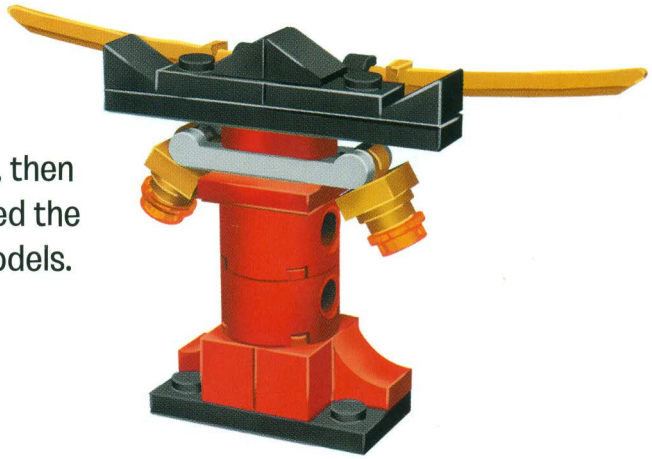

1. Put one blue and one red *angular plate* in front of you.

2. Close your eyes and shuffle the plates, before choosing one of them.

3. If you selected the blue element, then build three models. If you selected the red one, then try to build four models.

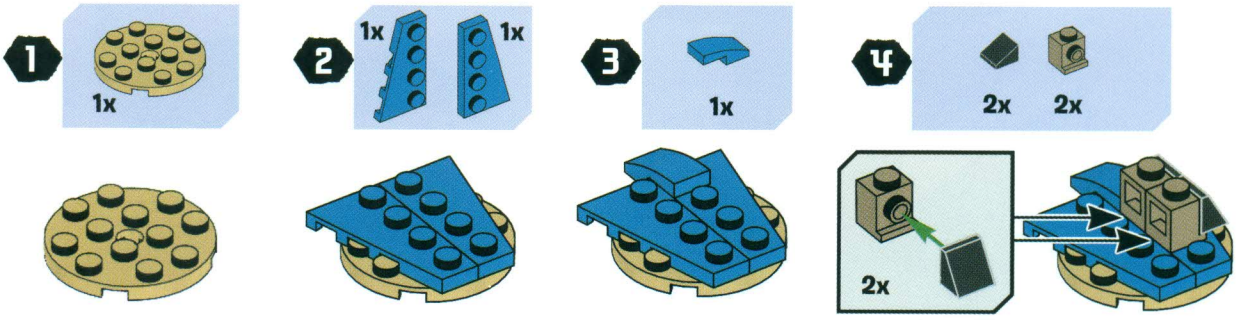

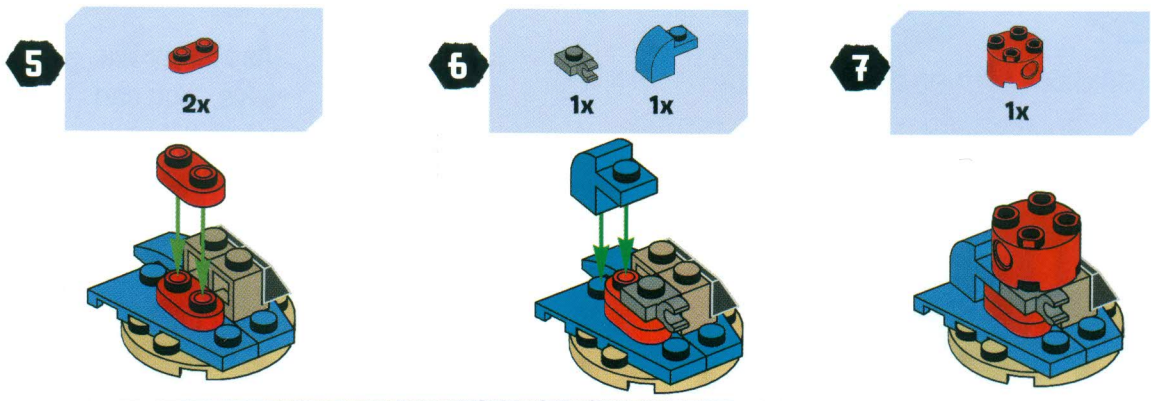

A humming fountain can help weary ninja relax, and a well will quench their thirst.
As Master Wu says, "You can rest well if you're surrounded by buildings that look older than you."
Every cosy corner should have a comfy seat!

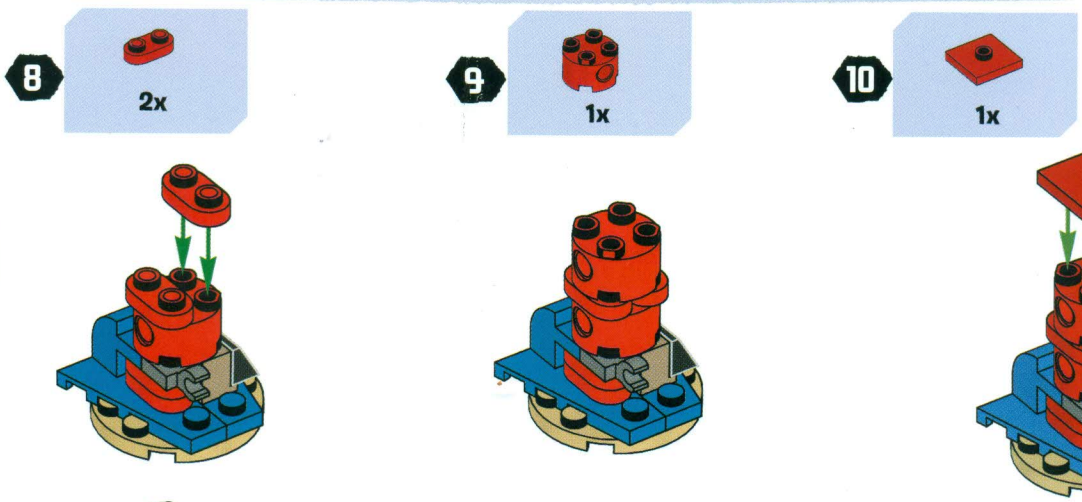

ANCIENT TEMPLE

The ninja have seen many ancient buildings with hidden secrets. Build this mysterious temple for them to visit during their next mission.

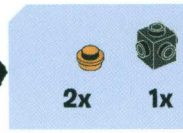

BUILDING INSTRUCTIONS

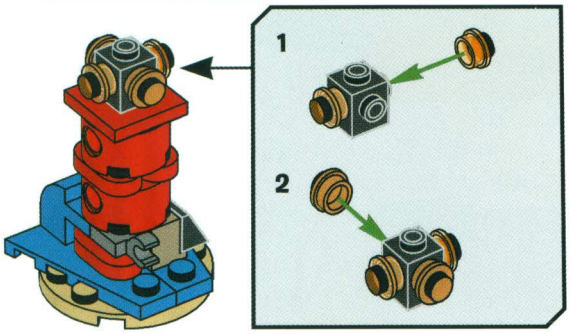

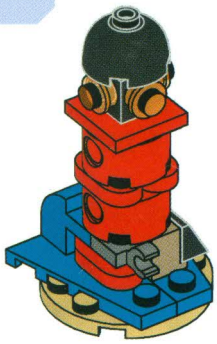

11

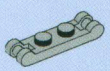

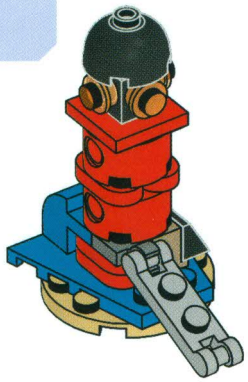

12

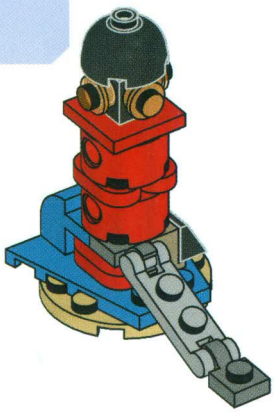

13

14

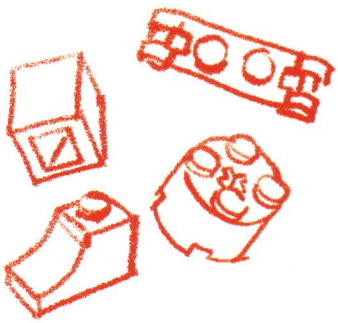

HMM, IT'S A SHAME THE ANCIENT SECRETS CAN'T BE HIDDEN IN VIDEO GAMES INSTEAD.

MEDITATION TIME

Sometimes it's difficult for Master Wu to concentrate in the Monastery of Spinjitzu. Build a temple where he can meditate in peace and quiet.

HOW IT'S DONE

1. Choose a building feature from the list below:

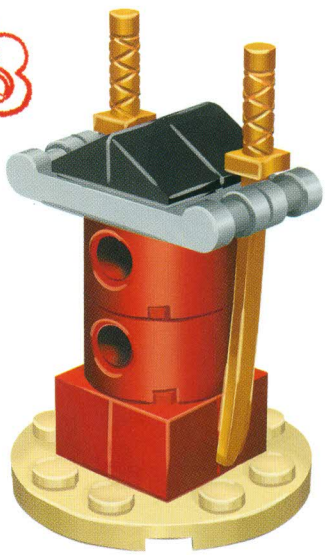

- MASSIVE COLUMNS
- SLANTED ROOF
- DOME AT THE TOP

2. Build a temple that includes your chosen feature.

3. Now build a second model with one of the other features. As Master Wu says, "There can never be too many places for meditation."

BRICK BOOST
YOU CAN ALSO TRY BUILDING ONE MODEL THAT CONTAINS ALL THREE OF THE LISTED FEATURES.
THE LAST TIME I TRIED TO MEDITATE, THE NINJA ASKED ME AS MANY QUESTIONS AS THE NUMBER OF WINTERS I'VE SEEN – WHICH IS A LOT!

DREAM HOLIDAY

After all the difficult missions they've accomplished, the ninja deserve a dream holiday. But where should they go?

HOW IT'S DONE

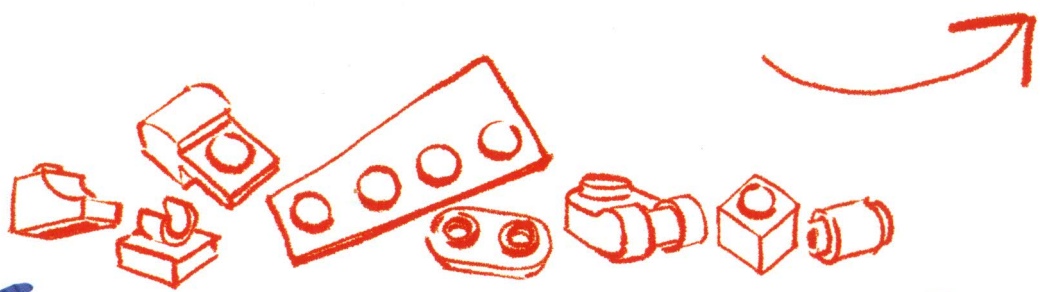

1. Read the opposite page to find out about a few potential holiday destinations.

2. Choose the one that you think would be the ninja's dream holiday.

3. Use your pieces to build the destination you have chosen.

Those who like peace and quiet would love a stay in the Endless Sea's abandoned lighthouse.

This hot tub in the monastery courtyard is perfect for ninja who don't like long journeys.

Chen's Island is ideal for anyone who wants to discover an island's secrets and see its throne.

I'M TEMPTED TO SIT ON THE THRONE OF THAT RASCAL, MASTER CHEN.

REMEMBER MASTER WU'S WORDS

Help the ninja protect their realm with this action-packed set of LEGO® NINJAGO® builds, activities and challenges.

With over 100 exciting ideas and 70 LEGO pieces included, you can build, re-build and create over and over again.

Each activity has been specially designed to take around five minutes, so you can spring into action as quickly as a ninja!
